Note: Availability of products in this guide varies by country.

Introduction to Your Projector

Refer to these sections to learn more about your projector and this manual.

[Projector Features](#)

[Notations Used in the Documentation](#)

[Where to Go for Additional Information](#)

[Projector Part Locations](#)

Projector Features

Your projector includes these special features:

Bright, high-resolution projection system

- Laser light source with up to 3300 lumens of color brightness (color light output) and 3300 lumens of white brightness (white light output)

Note: Color brightness (color light output) and white brightness (white light output) will vary depending on usage conditions. Color light output measured in accordance with IDMS 15.4; white light output measured in accordance with ISO 21118.

- Dynamic Tone Mapping optimizes HDR brightness and contrast
- Auto Low Latency Mode (ALLM) for smoother and more responsive gaming
- Scene Adaptive Gamma, Image Enhancement, and Frame Interpolation features
- Images up to 300 inches (7.62 m) for projection on any wall or screen

Flexible connectivity

- Two HDMI ports for video device or computer connections
- HDMI 2.1 support for full audio and video signal bandwidth and Enhanced Audio Return Channel (eARC) for uncompressed audio
- Support for an optical HDMI connection

Easy-to-use setup and operation features

- Powered vertical and horizontal lens shift
- Powered 2.1× optical zoom ratio for improved zooming capability
- Powered focus adjustments

- [Product Box Contents](#)
 - [Additional Components](#)
 - [Optional Equipment and Replacement Parts](#)
 - [Warranty and Registration Information \(U.S. and Canada\)](#)
 - [Warranty and Registration Information \(Latin America\)](#)

Product Box Contents

Save all the packaging in case you need to ship the projector. Always use the original packaging (or equivalent) when shipping.

Make sure your product box included all of these parts:

- 1 Projector
- 2 Remote control
- 3 Remote control batteries (two AA alkaline)
- 4 Power cord
- 5 Cable cover

Parent topic: [Projector Features](#)

[Attaching and Removing the Cable Cover](#)

Additional Components

Depending on how you plan to use the projector, you may need to obtain additional components.

Note: To connect a Mac that does not include a compatible video output port, you need to obtain an adapter that allows you to connect to an input port on the projector. Contact Apple for compatible adapter options. To connect a smartphone or tablet, you may need to obtain an adapter that allows you to connect to the projector. This allows you to mirror your smartphone or tablet screens, watch movies, and more. Contact your device manufacturer for compatible adapter options.

Unless listed as available from Epson in this table, see your local computer or electronics dealer for purchase information.

| Signal or connection type | Additional component necessary |
|---------------------------|---|
| HDMI | Compatible HDMI cable or HDMI 2.1 certified cable (ultra high-speed) Available for purchase from Epson or an authorized Epson reseller. |
| Optical HDMI | Compatible optical HDMI cable |
| External audio | Speakers, an audio video receiver, or a video source with speaker connections, and the cables necessary for connecting them Your projector does not have an internal speaker or audio out ports. |

Parent topic: [Projector Features](#)

Optional Equipment and Replacement Parts

U.S. and Canada: You can purchase screens, other optional accessories, and replacement parts from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada. Or you can purchase online at epsonstore.com (U.S. sales) or epsonstore.ca (Canadian sales).

Latin America: You can purchase optional accessories and replacement parts from an Epson authorized reseller. To find the nearest reseller, go to latin.epson.com. Or you can contact your nearest sales office as described in "Where to Get Help."

Note: Availability of accessories varies by country.

Epson offers the following optional accessories and replacement parts for your projector:

| Option or part | Part number |
|-------------------------------------|-------------|
| Replacement air filter (ELPAF62) | V13H134AB0 |
| Ceiling mount - white (ELPMB22) | V12H003B22 |
| Low profile ceiling mount (ELPMB30) | V12H526040 |
| Projector ceiling mount kit (white) | CHF4000 |
| Projector ceiling mount kit (black) | CHF4500 |
| Safety wire (ELPWR01) | V12H003W01 |

In addition to the accessories listed above, extended service plans are available.

Notations Used in the Documentation

Follow the guidelines in these notations as you read your documentation:

- **Warnings** must be followed carefully to avoid bodily injury.
- **Cautions** must be observed to avoid damage to your equipment.
- **Notes** contain important information about your projector.
- **Tips** contain additional projection information.

Parent topic: [Introduction to Your Projector](#)

Where to Go for Additional Information

Need quick help on using your projector? Here's where to look for help:

- epson.com/support (U.S.), epson.ca/support (Canada), or latin.epson.com/support (Latin America)

View FAQs (frequently asked questions) and e-mail your questions to Epson technical support 24 hours a day.

- If you still need help after checking this manual and any other sources listed here, you can use the Epson PrivateLine Support service to get help fast (U.S. and Canada only). For details, see "Where to Get Help."

Parent topic: [Projector Part Locations](#)

Setting Up the Projector

Follow the instructions in these sections to set up your projector for use.

[Projector Placement](#)

[Projector Connections](#)

[Attaching and Removing the Cable Cover](#)

[Installing Batteries in the Remote Control](#)

Projector Placement

You can place the projector on almost any flat surface to project an image.

You can also install the projector in a ceiling mount if you want to use it in a fixed location.

Keep these considerations in mind as you select a projector location:

- Place the projector on a sturdy, level surface or install it using a compatible mount.
- Place the projector so it squarely faces the screen, not at an angle.
- If you will use the projector at altitudes above 4921 feet (1500 m), turn on **High Altitude Mode** to ensure the projector's internal temperature is regulated properly.
- Try not to use the projector in locations subject to high humidity and dust, or in locations subject to smoke from fires or tobacco smoke.
- Leave plenty of space around and under the projector for ventilation, and do not place it on top of or next to anything that could block the vents.
- Position the projector within reach of a grounded electrical outlet or extension cord.

[Projector Setup and Installation Options](#)

[Projection Distance](#)

Parent topic: [Setting Up the Projector](#)

Related tasks

[Changing the Projection Mode Using the Menus](#)

Projector Setup and Installation Options

You can set up or install your projector in the following ways:

Front

Rear

Front Ceiling

Rear Ceiling

Wherever you set up the projector, make sure to position it squarely in front of the center of the screen, not at an angle, if possible. If the projector cannot be centered in front of the screen, use lens shift to reposition the image instead of using keystone correction for better image quality.

Note: If you use the projector tilted at an angle of more than three degrees, it could be damaged and cause an accident.

If you project from the ceiling or from the rear, be sure to select the correct **Projection** setting in the projector's Installation menu. If necessary, enable the **Inv Direction Button** setting in the projector's Operation menu.

Parent topic: [Projector Placement](#)

Related references

[Installation Settings - Installation Menu](#)

Projection Distance

The distance at which you place the projector from the screen determines the approximate size of the image. The image size increases the farther the projector is from the screen, but can vary depending on the zoom factor, aspect ratio, and other settings.

Note: The closer the projector is placed to the screen, the brighter the image will be.

Use the tables here to determine approximately how far to place the projector from the screen based on the size of the projected image. (Conversion figures may have been rounded up or down.) You can also use the Projection Distance Calculator [here](#) (U.S.), [here](#) (Canada), or [here](#) (Caribbean).

- 1 Projection distance
- 2 Distance from the center of the lens to the base of the screen (this changes depending on the setting for vertical lens shift)
- 3 Center of the lens

16:9 Aspect Ratio Image or Screen

| Screen or image size | Projection distance (1) Wide to Tele | Offset from lens center (2) |
|-----------------------------|---|---|
| 50 inches | 58 to 123 inches (148 to 313 cm) | -35.9 to 11.3 inches (-91 to 29 cm) |
| 60 inches | 70 to 148 inches (178 to 376 cm) | -43 to 13.6 inches (-109 to 35 cm) |
| 80 inches | 94 to 198 inches (239 to 503 cm) | -57.4 to 18.2 inches (-146 to 46 cm) |
| 100 inches | 118 to 248 inches (300 to 630 cm) | -71.7 to 22.7 inches (-182 to 58 cm) |
| 150 inches | 178 to 373 inches (452 to 947 cm) | -107.6 to 34 inches (-273 to 86 cm) |
| 200 inches | 238 to 498 inches (604 to 1264 cm) | -143.4 to 45.4 inches (-364 to 115 cm) |
| 250 inches | 297 to 623 inches (756 to 1582 cm) | -179.3 to 56.7 inches (-455 to 144 cm) |
| 300 inches | 357 to 748 inches (908 to 1899 cm) | -215.2 to 68.1 inches (-547 to 173 cm) |

4:3 Aspect Ratio Image or Screen

| Screen or image size | Projection distance (1) Wide to Tele | Offset from lens center (2) |
|-----------------------------|---|---|
| 50 inches | 72 to 151 inches (182 to 384 cm) | -43.9 to 13.9 inches (-111 to 35 cm) |
| 60 inches | 86 to 182 inches (219 to 462 cm) | -52.7 to 16.7 inches (-134 to 42 cm) |

| Screen or image size | Projection distance (1) Wide to Tele | Offset from lens center (2) |
|-----------------------------|---|---|
| 80 inches | 115 to 243 inches (293 to 617 cm) | -70.2 to 22.2 inches (-178 to 56 cm) |
| 100 inches | 145 to 304 inches (368 to 772 cm) | -87.8 to 27.8 inches (-223 to 71 cm) |
| 120 inches | 174 to 365 inches (442 to 927 cm) | -105.3 to 33.3 inches (-268 to 85 cm) |
| 150 inches | 218 to 457 inches (554 to 1160 cm) | -131.7 to 41.7 inches (-334 to 106 cm) |
| 200 inches | 291 to 610 inches (740 to 1548 cm) | -175.6 to 55.6 inches (-446 to 141 cm) |
| 220 inches | 321 to 671 inches (814 to 1704 cm) | -193.1 to 61.1 inches (-491 to 155 cm) |
| 244.8 inches | 357 to 746 inches (906 to 1896 cm) | -214.8 to 68 inches (-546 to 173 cm) |

16:10 Aspect Ratio Image or Screen

| Screen or image size | Projection distance (1) Wide to Tele | Offset from lens center (2) |
|-----------------------------|---|---|
| 50 inches | 63 to 133 inches (160 to 339 cm) | -38.6 to 12.2 inches (-98 to 31 cm) |
| 60 inches | 76 to 160 inches (193 to 407 cm) | -46.5 to 14.6 inches (-118 to 37 cm) |
| 80 inches | 102 to 214 inches (259 to 544 cm) | -62.2 to 19.7 inches (-158 to 50 cm) |

| Screen or image size | Projection distance (1) Wide to Tele | Offset from lens center (2) |
|----------------------|---|---|
| 100 inches | 128 to 269 inches (324 to 682 cm) | -77.6 to 24.4 inches (-197 to 62 cm) |
| 120 inches | 154 to 322 inches (390 to 819 cm) | -92.9 to 29.5 inches (-236 to 75 cm) |
| 150 inches | 193 to 403 inches (489 to 1024 cm) | -116.1 to 36.6 inches (-295 to 93 cm) |
| 200 inches | 257 to 538 inches (653 to 1367 cm) | -155.1 to 49.2 inches (-394 to 125 cm) |
| 250 inches | 322 to 673 inches (817 to 1710 cm) | -193.7 to 61.4 inches (-492 to 156 cm) |
| 277.2 inches | 357 to 747 inches (907 to 1897 cm) | -215 to 68.1 inches (-546 to 173 cm) |

Parent topic: [Projector Placement](#)

Projector Connections

See these sections to connect the projector to a variety of projection sources.

Caution: If you will use the projector at altitudes above 4921 feet (1500 m), turn on **High Altitude Mode** to ensure the projector's internal temperature is regulated properly. The cooling fans will run at a higher speed and will be slightly louder.

Caution: Check the shape and orientation of the connectors on any cable you plan to connect. Do not force a connector into a port if it does not fit. The device or your projector could be damaged or could malfunction.

[Installation Settings - Installation Menu](#)

Connecting to an HDMI Video Source

If your video source has an HDMI port, you can connect it to the projector using an optional HDMI cable. The HDMI connection provides the best image quality.

Caution: Do not turn on the video source before connecting it to the projector. Doing so could damage the projector.

Note:

- When projecting images at 4K 120Hz, use an HDMI 2.1 rated cable (ultra-high speed). If you use an incompatible cable, images may not be displayed correctly. You can try correcting the images by changing the **EDID Mode** setting in the projector's Signal I/O menu.
- If the port on the device you connect has an unusual shape, use the cable supplied with the device or an optional cable to connect to the projector.
- The cable differs depending on the output signal from the connected video devices.
- Some video devices are capable of outputting different types of signals. See your video device manual to confirm what type of signals can be output.

1. Connect the HDMI cable to your video source's HDMI output port.

2. Connect the other end to one of the projector's HDMI ports. If you are connecting an optical HDMI cable, you must also connect the cable's USB power connector to the **Opt.HDMI (300mA)** port.

Note: When an audio/video source that meets the HDMI CEC standard is connected to the projector's HDMI port, you can use the projector's remote control to control certain features of the linked device by pressing the **HDMI Link** button on the remote control and setting **HDMI Link** to **On**.

Parent topic: [Projector Connections](#)

Connecting to a Computer for HDMI Video

If your computer has an HDMI port, you can connect it to the projector using an optional HDMI cable.

Note: To connect a Mac that does not include a compatible video output port, you need to obtain an adapter that allows you to connect to an input port on the projector. Contact Apple for compatible adapter options. To connect a smartphone or tablet, you may need to obtain an adapter that allows you to connect to the projector. This allows you to mirror your smartphone or tablet screens, watch movies, and more. Contact your device manufacturer for compatible adapter options.

1. Connect the HDMI cable to your computer's HDMI output port.

2. Connect the other end to one of the projector's HDMI ports. If you are connecting an optical HDMI cable, you must also connect the cable's USB power connector to the **Opt.HDMI (300mA)** port.

Parent topic: [Projector Connections](#)

Connecting to a Streaming Media Player

You can connect a streaming media player to the projector. By connecting the streaming media player's power supply USB cable, you can power the streaming media player from the projector.

1. Connect the streaming media player to an **HDMI** port.

2. If necessary, connect the streaming media player's power supply USB cable to the **USB-A** port. Connect the other end of the cable to the USB port on the streaming media player.

Parent topic: [Projector Connections](#)

Connecting External Output Devices

See these sections to connect the projector to external output devices.

[Connecting an A/V System or External Speakers Using HDMI ARC](#)

[Connecting to a Trigger Out Port](#)

Parent topic: [Projector Connections](#)

Connecting an A/V System or External Speakers Using HDMI ARC

If your A/V system or external speakers are eARC/ARC-compatible, you can connect them to the projector's **HDMI2 (eARC/ARC)** port using an optional HDMI cable with Ethernet.

Note: Make sure the **HDMI Link** setting is turned on in the projector's Signal I/O menu.

1. Connect the HDMI cable to the HDMI port on your A/V system or external speakers.

2. Connect the other end of the cable to the **HDMI2 (eARC/ARC)** port on the rear of the projector.

3. Adjust any necessary settings on the connected A/V system or external speakers. See your device's documentation for more information.

Parent topic: [Connecting External Output Devices](#)

Connecting to a Trigger Out Port

You can connect your projector to external devices such as motorized screens or a motorized anamorphic lens that support a trigger signal. When active, a 12V (200mA maximum) signal is sent to the connected device while the projector is powered on. See the link below for cable specifications.

Note: If you select **Anamorphic Wide** as the **Trigger Out** setting, voltage is only output from the **Trigger Out** port when the **Aspect** setting is set to **Anamorphic Wide** or **Horiz.Squeeze**.

1. Connect a 3.5 mm mono or stereo mini-jack cable to the external device's trigger port. See your device's documentation for details.

2. Connect the other end to the projector's **Trigger Out** port.

3. Turn on the **Trigger Out** setting in the projector's Operation menu. See the link below for setting descriptions.

Attaching and Removing the Cable Cover

You can attach the cable cover that came with your projector to hide the attached cables from view.

1. Carefully place the projector upside down on a flat, stable surface.

2. Bundle the cables together using a band or other fastener (not provided) and pass it through the cable holder as shown.

Caution: Do not bundle the power cord to the other cables. Otherwise, a fire may occur.

3. Place the cable cover on the projector as shown, guiding the cables through the notch on the base of the cable cover. Make sure the cable cover screws fit into the holes on the projector.

4. Tighten both cable cover screws.

To remove the cover, loosen both screws and pull the cover off of the projector.

Parent topic: [Setting Up the Projector](#)

Installing Batteries in the Remote Control

The remote control uses the two AA batteries that came with the projector. Replace the batteries as soon as they run out.

Caution: Use only the type of batteries specified in this manual. Do not install batteries of different types, or mix new and old batteries.

1. Remove the battery cover.

2. Remove the old batteries, if necessary.
3. Insert the batteries with the + and – ends facing as shown.

Warning: Make sure the batteries are inserted in the correct positions. If the batteries are not inserted correctly, they could explode or leak, causing a fire, injury, or damage to the product.

4. Replace the battery cover and press it down until it clicks into place.

Warning: Dispose of used batteries according to local regulations. Do not expose batteries to heat or flame. Keep batteries out of the reach of children; they are choking hazards and are very dangerous if swallowed.

Parent topic: [Setting Up the Projector](#)

Monitoring and Controlling the Projector

Follow the instructions in these sections to monitor and control the projector over a network.

Note: Your product does not support network projection.

[Connecting to a Wired Network](#)

[Selecting Wired Network Settings](#)

[Controlling a Networked Projector Using a Web Browser](#)

[PJLink](#)

[ESC/VP21 Commands](#)

Connecting to a Wired Network

To connect the projector to a wired local area network (LAN), use a 100Base-TX or 10Base-T network cable. To ensure proper data transmission, use a Category 5 shielded cable or higher.

Note: Your product does not support network projection. The **LAN** port is only used to monitor and control the projector over a network.

1. Connect one end of the network cable to your network hub, switch, or router.
2. Connect the other end of the cable to the projector's **LAN** port.

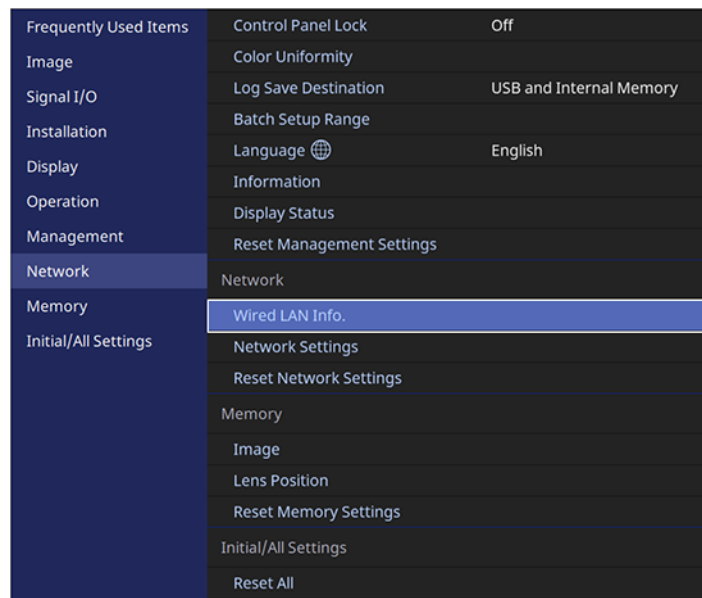

Parent topic: [Monitoring and Controlling the Projector](#)

Selecting Wired Network Settings

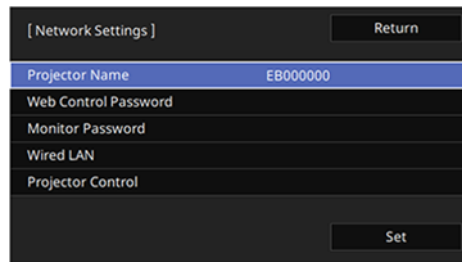

Before you can control the projector on your network, you must select the network settings for the projector using its menu system.

Note: Make sure you already connected the projector to your wired network using the **LAN** port.

1. Turn on the projector.
2. Press the **Menu** button.
3. Select the **Network** menu and press **Enter**.

4. Select **Network Settings** and press **Enter**.

5. Select **Projector Name** to enter a name to identify the projector over the network

Note: Use the displayed keyboard to enter the name. Press the arrow buttons on the remote control to highlight characters and press **Enter** to select them. Select **OK** when you are done.

6. If you want to access the projector over the network, select **Web Control Password** and set a password.

Note: The user name is EPSONWEB and no password is set by default. If you do not set a Web Control Password, you will not be able to access the projector via Epson Web Control.

7. Select **Wired LAN** and press **Enter**.

8. Select **IP Settings** and press **Enter**.
9. Select your IP Settings as necessary:
 - If your network assigns addresses automatically, select **On** as the **DHCP** setting.

- If you must set addresses manually, select **Off** as the **DHCP** setting. Enter the projector's **IP Address**, **Subnet Mask**, and **Gateway Address** as needed.

Note: Use the displayed keypad to enter numbers. Press the arrow buttons on the remote control to highlight numbers and press **Enter** to select them. Select **OK** when you are done.

10. Press **Esc** to return to the Wired LAN menu.
11. To prevent display of the IP address on the network information screen, select **Off** as the **IP Address Display** setting.
12. Press **Esc** to return to the Network Settings menu.
13. Select **Projector Control** and press **Enter**. Choose from the available options.
14. When you finish selecting settings, return to the **Network Settings** screen. Select **Set** and follow the on-screen instructions to save your settings and exit the menus.

Note: If the Web Control Password has not been set, a screen prompting you to set a password is displayed. Follow the on-screen instructions to set the password.

[Projector Control Settings](#)

Parent topic: [Monitoring and Controlling the Projector](#)

Projector Control Settings

You can select the following settings for controlling the projector over a network.

| Setting | Options | Description |
|------------------------|-------------------------|---|
| Basic Control | On Off | Enable to monitor and control the projector using Basic Control in Epson Web Control |
| Remote Password | -- | Enter a password to access the projector using Basic Control in Epson Web Control. (The user name is EPSONREMOTE. No password is set by default.) |
| PJLink | On Off | Set to On to enable the PJLink notification function |

| Setting | Options | Description |
|-----------------------------|-------------------------------|--|
| PJLink Password | Up 32 alphanumeric characters | Enter a password for using the PJLink protocol for projector control (do not use spaces or any symbols besides @) |
| Notified IP Address | Various IP addresses | Enter the IP address to receive the projector's operating status when the PJLink notification function is enabled. Enter the addresses using 0 to 255 for each address field. Do not use these addresses: 127.x.x.x or 224.0.0.0 through 255.255.255.255 (where x is a number from 0 to 255). |
| AMX Device Discovery | On Off | Set to On to allow AMX Device Discovery to detect the projector |
| Control4 SDDP | On Off | Set to On to allow device information to be acquired using Control4 Simple Device Discovery Protocol (SDDP) |

Parent topic: [Selecting Wired Network Settings](#)

Controlling a Networked Projector Using a Web Browser

Once you have connected your projector to your network, you can select projector settings and control projection using a compatible web browser. This lets you access the projector remotely.

Note: Make sure that the projector and your computer or device are on the same network and that you have set a **Web Control Password** in the Network Settings menu or you cannot access the Web Control screen.

Note: The web setup and control features support Microsoft Edge (Windows), Safari (Mac), and Chrome (Android) on networks that do not use a proxy server for connection. You cannot select all of the projector menu settings or control all projector functions using a web browser.

Note: If you set Standby Mode to **Communication On**, you can use a web browser to select settings and control projection even if the projector is in standby mode.

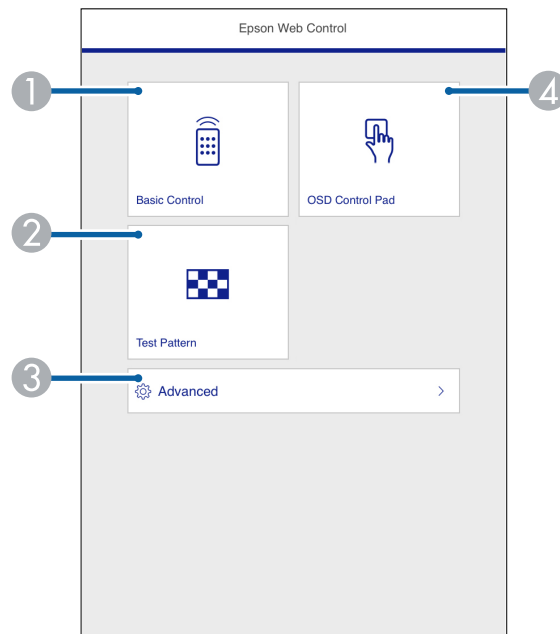

1. Make sure the projector is turned on.
2. Start your web browser on a computer or device connected to the network.
3. Enter the projector's IP address into the browser's address box (if you are entering an IPv6 address, wrap the address with [and]).

Note: You can find the projector's IP address by selecting **Wired LAN Info.** in the projector's Network menu.

Note: You may need to log in to access some of the options on the Web Control screen. If you see a log in window, enter your user name and password.

- For the Basic Control option, use **EPSONREMOTE** as the user name and enter the **Remote Password**. No password is set by default.
- For all other options, use **EPSONWEB** as the user name and enter the **Web Control Password**. No password is set by default.
- You can change the password in the projector's Network menu:
 - **Network > Network Settings > Projector Control > Basic Control > Remote Password**
 - **Network > Network Settings > Web Control Password**

You see the Epson Web Control screen.

- 1 Select **Basic Control** to control the projector remotely.
- 2 Select **Test Pattern** to display a test pattern
- 3 Select **Advanced** to open the advanced menu screen.
- 4 Select **OSD Control Pad** to change the projector's menu settings.

Note:

- You cannot change the following settings using Epson Web Control:
 - **EDID**
 - **HDMI Link**
 - **Language**
 - **Display Status**
 - **Reset Network Settings**

- **Firmware Update**
- You can only set the following settings using Epson Web Control:
 - **Monitor Password** (up to 16 alphanumeric characters)
 - HTTP port (port number used for Web Control except for 80 [default], 843, 3620, 3621, 3625, 3629, 4352, 4649, 5357, 10000, 10001, 41794)

4. Select the option corresponding to the projector function you want to control.

Parent topic: [Monitoring and Controlling the Projector](#)

PJLink

PJLink was established by the JBMIA (Japan Business Machine and Information System Industries Association) as a standard protocol for controlling network compatible projectors as part of their efforts to standardize projector control protocols. The projector complies with the PJLink Class2 standard established by the JBMIA. The port number used for the PJLink search function is 4352 (UDP). You need to make network settings before you can use PJLink. It complies with all commands except for the following commands defined by PJLink Class2, and confirmed by the PJLink standard adaptability verification.

Non-compatible commands:

- Auto muting set - **AVMT 21**
- Image muting set - **AVMT 11**

Input ports and corresponding input source number:

- HDMI1 - **32**
- HDMI2 - **33**

Manufacturer name displayed for "Manufacture name information query": **EPSON**

Model name displayed for "Product name information query":

- EPSON QB1000B
- EPSON QB1000W

For additional information, visit the Epson website and search for your product's support page.

Parent topic: [Monitoring and Controlling the Projector](#)

ESC/VP21 Commands

You can control the projector from an external device using ESC/VP21.

When a command is input, the projector executes the command and returns a ":", and then accepts the next command.

If the command being processed terminates abnormally, an error message is output and a ":" is returned.

Add a Carriage Return (CR) code (0Dh) to the end of each command and transmit.

For additional information, visit the Epson website and search for your product's support page.

Turning On the Projector

Turn on the projector before you turn on the computer or video equipment you want to use.

Note: When powering on the projector for the first time, the initial setup wizard is displayed. Use the arrow and **Enter** buttons on the control panel or remote control to set the focus, projection mode, and language. The projector's menu screens are displayed in black by default. You can change the color theme using the **Menu Color** setting in the Display menu.

1. Connect the power cord to the projector's power inlet.

2. Plug the power cord into an electrical outlet.

Note: With **Direct Power On** turned on, the projector turns on as soon as you plug it in.

3. Press the power button on the projector or the **On** button on the remote control to turn on the projector.

The lens shutter opens and the Status light flashes blue as the projector warms up. Once the projector is warmed up, the Status light stops flashing and turns blue.

Warning: Never look into the projector lens when the laser is on. This can damage your eyes and is especially dangerous for children and pets. If you are using the remote control to turn the projector on, make sure no one is looking into the lens or in front of the projector before turning it on.

Caution: Make sure no objects are blocking the light from the projector lens. Objects blocking the lens for an extended time can melt and light that is reflected back into the lens can cause the projector to malfunction. Turn off the projector to stop projection.

If you do not see a projected image right away, try the following:

- Turn on the connected computer or video device.
- Insert a DVD or other video media and press the play button, if necessary.
- Press the **Source** button on the projector or one of the Source buttons on the remote control.
- Change the screen output from the computer when using a laptop.

Turning Off the Projector

Before turning off the projector, shut down any computer connected to it so you can see the computer display during shutdown.

Note: Turn off this product when not in use to prolong the life of the projector. Laser life will vary depending upon mode selected, environmental conditions, and usage. Brightness decreases over time.

1. Press the power button on the projector or the **Standby** button on the remote control.

The projector displays a shutdown confirmation screen.

Note: You can turn off the shutdown confirmation screen in the projector's Display menu.

2. Press the power button on the projector or the **Standby** button on the remote control again. (To leave it on, press any other button.)

The laser turns off and the lens shutter closes. The Status light flashes and then turns off.

3. To transport or store the projector, make sure the Status light is off, then unplug the power cord.

Caution: To avoid damaging the projector or laser, never unplug the power cord when the Status light is on or flashing.

Selecting the Language for the Projector Menus

If you want to view the projector's menus and messages in another language, you can change the Language setting.

1. Turn on the projector.
2. Press the **Menu** button.
3. Select the **Management** menu and press **Enter**.

4. Select the **Language** setting and press **Enter**.
5. Select the language you want to use and press **Enter**.
6. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Using Basic Projector Features](#)

Adjusting the Image Height

If you are projecting from a table or other flat surface, and the image is too high or low, you can adjust the image height using the projector's adjustable feet.

1. Turn on the projector and display an image.
2. If the image is tilted, rotate the front feet to adjust their height.

Note: You can adjust the image position up to approximately three degrees.

3. To adjust the position of the projected image further, press the **Lens** button on the remote control or projector until **Adjust Lens Shift** appears on the screen and follow the on-screen instructions.

If the projected image is unevenly rectangular, you need to adjust the image shape.

Parent topic: [Using Basic Projector Features](#)

Related concepts

[Image Shape](#)

Adjusting the Image Position Using Lens Shift

If you cannot install the projector directly in front of the screen, you can adjust the position of the projected image using the lens shift feature.

Caution: Do not put your finger in the moving parts of the projector's lens or you may be injured.

1. Turn on the projector and display an image.
2. Press the **Lens** button on the control panel or remote control.

3. Press the **Lens** button repeatedly until **Adjust Lens Shift** appears on the screen.
4. Press the arrow buttons on the remote control or the control panel to adjust the position of the projected image as necessary.

- 1 Maximum horizontal range (H × 47%)
- 2 Maximum vertical range (V × 96%)
- 3 1/2 the vertical height of the image
- 4 1/2 the horizontal width of the image

Note: You cannot move the image to both the horizontal and vertical maximum values.

5. When you are finished, press the **Esc** button on the control panel or remote control.

Note: When adjusting the image height, position the image lower than where you want it to be and then move it up. This will help prevent the image from moving down after adjustment. The image is clearest when the lens is at the home position. To move the lens to the home position, press and hold the **Lens** button on the remote control or control panel for at least three seconds.

Parent topic: [Using Basic Projector Features](#)

Image Shape

You can project an evenly rectangular image by placing the projector directly in front of the center of the screen and keeping it level. If you place the projector at an angle to the screen, or tilted up or down, or off to the side, you may need to correct the image shape for the best display quality.

For the best quality images, try to adjust the projector's position to achieve the correct image size and shape before using digital correction methods.

Note: If you are mounting the projector from the ceiling, use the adjustment controls on the mount at the time of installation.

[Correcting Image Shape with H/V-Keystone](#)

[Correcting Image Shape with Quick Corner](#)

[Correcting Image Shape with Point Correction](#)

Parent topic: [Using Basic Projector Features](#)

Correcting Image Shape with H/V-Keystone

You can use the projector's **H/V-Keystone** setting to correct the shape of an image that is unevenly rectangular on the sides.

Note: Try adjusting the projector's placement and lens shift before using keystone correction. Digital image correction reduces the number of pixels in the image.

Note: You can correct images up to 30° left, right, up, or down.

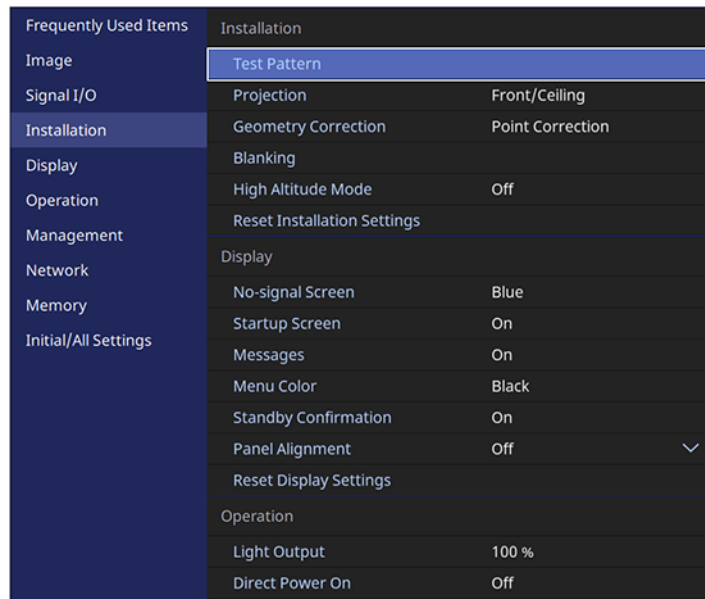

Note: You cannot combine H/V-Keystone correction with other image shape correction methods.

1. Turn on the projector and display an image.

Note: You can also display a pattern to aid in adjusting the projected image using the **Pattern** button on the remote control.

2. Press the **Menu** button.

3. Select the **Installation** menu and press **Enter**.

4. Select the **Geometry Correction** setting and press **Enter**.
5. Select **H/V-Keystone** and press **Enter**.

Note: If you see a confirmation message, select **Yes** and press **Enter**.

You see the H/V-Keystone adjustment screen:

- Use the arrow buttons on the projector or the remote control to select between vertical and horizontal keystone correction and to adjust the image shape as necessary.

V-Keystone

H-Keystone

- When you are finished, press **Esc**.
After correction, your image is slightly smaller.

[Adjusting the Image Position Using Lens Shift](#)

Correcting Image Shape with Quick Corner

You can use the projector's Quick Corner setting to correct the shape and size of an image that is unevenly rectangular on all sides.

1. Turn on the projector and display an image.

Note: You can also display the pattern by pressing the **Pattern** button on the remote control.

2. Press the **Menu** button.
3. Select the **Installation** menu and press **Enter**.

| | |
|-----------------------|--------------------------------------|
| Frequently Used Items | Installation |
| Image | Test Pattern |
| Signal I/O | Projection Front/Ceiling |
| Installation | Geometry Correction Point Correction |
| Display | Blanking |
| Operation | High Altitude Mode Off |
| Management | Reset Installation Settings |
| Network | Display |
| Memory | No-signal Screen Blue |
| Initial/All Settings | Startup Screen On |
| | Messages On |
| | Menu Color Black |
| | Standby Confirmation On |
| | Panel Alignment Off |
| | Reset Display Settings |
| | Operation |
| | Light Output 100 % |
| | Direct Power On Off |

4. Select the **Geometry Correction** setting and press **Enter**.
5. Select the **Quick Corner** setting and press **Enter**.

Note: You may see a confirmation screen. Select **Yes** and press **Enter** again.

You see the Quick Corner adjustment screen:

6. Use the arrow buttons on the projector or remote control to select the corner of the image you want to adjust. Then press **Enter**.

Note: To reset your adjustments, press and hold the **Esc** button for at least 2 seconds to display a reset screen. Then select **Yes**.

7. Press the arrow buttons to adjust the image shape as necessary. Press **Enter** to return to the area selection screen.

Note: If one of the directional arrows on the screen turns gray, you cannot adjust the shape any further in that direction.

8. When you are finished, press **Esc**.

The **Geometry Correction** setting is now set to **Quick Corner** in the projector's Installation menu. If you press the keystone adjustment buttons on the control panel, the area selection screen appears.

Parent topic: [Image Shape](#)

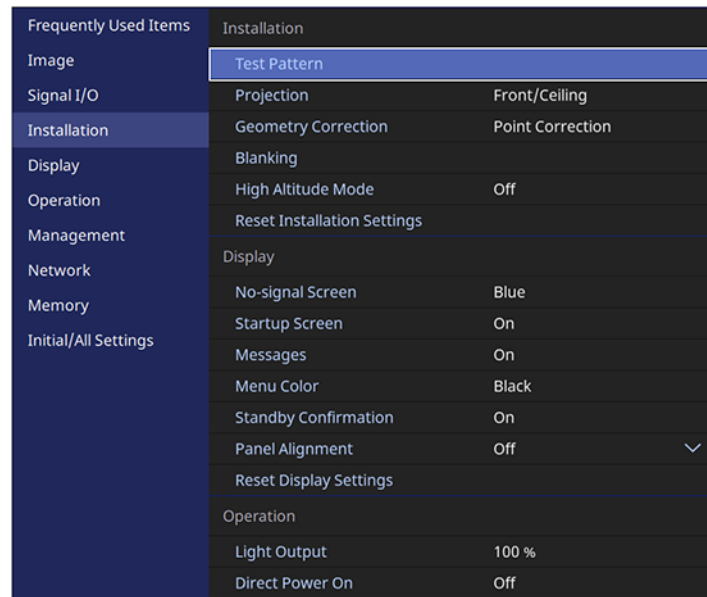

Correcting Image Shape with Point Correction

You can use the projector's Point Correction feature to fine-tune the image shape using points on a grid. This is useful for adjusting overlapping areas in multiple projected images that do not line up correctly.

1. Turn on the projector and display an image.
2. Press the **Menu** button.

3. Select the **Installation** menu and press **Enter**.

4. Select the **Geometry Correction** setting and press **Enter**.
5. Select the **Point Correction** setting and press **Enter**.

Note: If you see a confirmation message, select **Yes** and press **Enter**.

6. Select **Point Correction** again and press **Enter**.

Note: For fine tuning, select **Quick Corner** to roughly correct the shape and size of an image and then select **Point Correction** to adjust them more precisely.

You see a grid on the projected image.

Note: If you want to change the color of the grid lines, select the **Pattern Color** setting and select a color.

7. Select **Point Correction**, then select the grid size.

- Use the arrow buttons to move to the point on the grid that you want to adjust and press **Enter**.

- Use the arrow buttons as necessary to correct the image shape.

- Press **Esc** to return to the previous screen and select another point to correct, if necessary.
- When you are finished, press the **Esc** button.

Parent topic: [Image Shape](#)

Resizing the Image with the Zoom Feature

You can adjust the size of the projected image using the zoom feature.

- Turn on the projector and display an image.

2. Press the **Lens** button on the control panel or remote control.

3. Press the **Lens** button repeatedly until **Adjust Zoom** is displayed on the screen.
4. Press and hold the left or right arrow button on the control panel or remote control to resize the image.
5. Press the **Esc** button on the control panel or remote control when finished.

Parent topic: [Using Basic Projector Features](#)

Focusing the Image with the Lens Button

You can adjust the sharpness of the projected image using the focus feature.

1. Turn on the projector and display an image.
2. Press the **Lens** button on the control panel or remote control.

3. Press the **Lens** button repeatedly until **Adjust Focus** is displayed on the screen.
4. Press and hold the left or right arrow button on the control panel or remote control to focus the image.
5. Press the **Esc** button on the control panel or remote control when finished.

Parent topic: [Using Basic Projector Features](#)

Remote Control Operation

The remote control lets you control the projector from almost anywhere in the room. You can point it at the screen, or the front or back of the projector.

Make sure that you aim the remote control at the projector's receivers within the distance and angles listed here.

- 1 32 feet (10 m)
- 2 $\pm 30^\circ$
- 3 60°

Note: Avoid using the remote control in conditions with bright fluorescent lights or in direct sunlight, or the projector may not respond to commands. If you will not use the remote control for a long time, remove the batteries.

Parent topic: [Using Basic Projector Features](#)

Selecting an Image Source

If you connected multiple image sources to the projector, such as a computer and DVD player, you may want to switch from one image source to the other.

1. Make sure the connected image source you want to use is turned on.
2. For video image sources, insert a DVD or other video media and press its play button, if necessary.
3. Do one of the following:
 - Press the **Source** button on the projector until you see the image from the source you want.

- Press the button for the source you want on the remote control.

Parent topic: [Using Basic Projector Features](#)

Projection Modes

Depending on how you positioned the projector, you may need to change the projection mode so your images project correctly.

- **Front** (default setting) lets you project from a table in front of the screen.
- **Front/Ceiling** flips the image over top-to-bottom to project upside-down from a ceiling or wall mount.

- **Rear** flips the image horizontally to project from behind a translucent screen.
- **Rear/Ceiling** flips the image over top-to-bottom and horizontally to project from the ceiling and behind a translucent screen.

Changing the Projection Mode Using the Menu

Parent topic: [Using Basic Projector Features](#)

Changing the Projection Mode Using the Menu

You can change the projection mode to flip the image over top-to-bottom and/or left-to-right using the projector menus.

1. Turn on the projector and display an image.
2. Press the **Menu** button.
3. Select the **Installation** menu and press **Enter**.

| | | |
|-----------------------|-----------------------------|------------------|
| Frequently Used Items | Installation | |
| Image | Test Pattern | |
| Signal I/O | Projection | Front/Ceiling |

Image Aspect Ratio

The projector can display images in different width-to-height ratios called aspect ratios. Normally the input signal from your video source determines the image's aspect ratio. However, for certain images you can change the aspect ratio to fit your screen by pressing a button on the remote control.

[Changing the Image Aspect Ratio](#)

[Available Image Aspect Ratios](#)

Parent topic: [Using Basic Projector Features](#)

Changing the Image Aspect Ratio

You can change the aspect ratio of the displayed image to resize it.

Note: The available aspect ratio setting varies depending on the input signal.

1. Turn on the projector and switch to the image source you want to use.
2. Press the **Aspect** button on the remote control.

A list of the available aspect ratios appears.

3. Select the aspect ratio you want and press **Enter**.
4. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Image Aspect Ratio](#)

Available Image Aspect Ratios

You can select the following image aspect ratios, depending on the input signal from your image source.

Note: Selecting an aspect ratio other than the ratio from the input signal may distort the projected image. Using the aspect ratio function of the projector to reduce, enlarge, or split the projected image for commercial purposes or for public viewing may infringe upon the rights of the copyright holder of that image based on copyright law.

| Aspect ratio setting | Description |
|------------------------|--|
| Auto | Automatically sets the aspect ratio according to the input signal (this setting is recommended in most cases). |
| Full | Displays images using the full width of the projection area, but does not maintain the aspect ratio and can distort the image. |
| Zoom | Displays images using the full width of the projection area and maintains the aspect ratio of the image, but can cut off parts of the image. |
| Anamorphic Wide | Displays images that have a 2.40:1 aspect ratio when using a commercially available anamorphic lens. Set the Overscan setting in the projector's Signal I/O menu to Off or the image will not display correctly. |
| Horiz. Squeeze | Displays images using the full width of the projection area when using a commercially available anamorphic lens. |

Color Mode

The projector offers different Color Modes to provide optimum brightness, contrast, and color for a variety of viewing environments and image types. You can select a mode designed to match your image and environment, or experiment with the available modes.

[Changing the Color Mode](#)

[Available Color Modes](#)

Parent topic: [Using Basic Projector Features](#)

Changing the Color Mode

You can change the projector's Color Mode using the remote control to optimize the image for your viewing environment.

1. Turn on the projector and switch to the image source you want to use.
2. If you are projecting from a DVD player or other video source, insert a disc or other video media and press the play button, if necessary.
3. Press the **Color Mode** button on the remote control.

A list of available Color Modes appears.

4. Select the color mode you want and press **Enter**.
5. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Color Mode](#)

Available Color Modes

You can set the projector to use these Color Modes, depending on the input source you are using:

| Color Mode | Description |
|----------------|--|
| Dynamic | Best for prioritizing brightness |
| Vivid | Best for projecting in a bright environment |
| Cinema | Best for projecting movies in a dark environment |
| Natural | Best for adjusting the image color |

Parent topic: [Color Mode](#)

Adjusting Image Sharpness

You can adjust the outline of an image by adjusting its sharpness.

1. Turn on the projector and display an image.
2. Press the **Menu** button.
3. Select the **Image** menu and press **Enter**.

The screenshot shows a dark-themed menu interface. On the left, a vertical list of menu categories is shown: Frequently Used Items, Image, Signal I/O, Installation, Display, Operation, Management, Network, Memory, and Initial/All Settings. The 'Image' category is selected and highlighted in blue. To the right of this list, a sub-menu titled 'Image' is displayed, listing various settings: Color Mode, Presentation, Brightness (50), Contrast (50), Color Saturation (50), Tint (50), Sharpness, White Balance, Frame Interpolation (Off), Dynamic Contrast (Off), Deinterlacing (Off), Image Enhancement, Scene Adaptive Gamma (5), Gamma (0), RGBCMY, Reset to Defaults, Source (Computer1), Aspect (Auto), and another Reset to Defaults option at the bottom.

| Frequently Used Items | Image | |
|-----------------------|----------------------|--------------|
| Image | Color Mode | Presentation |
| Signal I/O | Brightness | 50 |
| Installation | Contrast | 50 |
| Display | Color Saturation | 50 |
| Operation | Tint | 50 |
| Management | Sharpness | |
| Network | White Balance | |
| Memory | Frame Interpolation | Off |
| Initial/All Settings | Dynamic Contrast | Off |
| | Deinterlacing | Off |
| | Image Enhancement | |
| | Scene Adaptive Gamma | 5 |
| | Gamma | 0 |
| | RGBCMY | |
| | Reset to Defaults | |
| | Source | Computer1 |
| | Aspect | Auto |
| | Reset to Defaults | |

4. Select the **Sharpness** setting and press **Enter**.
5. Choose from the following options:
 - **Standard:** enhances outlines for the entire image, including the **Thin Line Enhancement** and **Thick Line Enhancement** settings.
 - **Thin Line Enhancement:** enhances details such as hair and clothing patterns
 - **Thick Line Enhancement:** enhances backgrounds and larger elements
6. Use the left and right arrow buttons to adjust the sharpness values.
7. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Using Basic Projector Features](#)

Adjusting the Projector's Brightness Level

You can adjust the brightness of your projector's light source.

Note: The projector uses a laser as the light source with the following characteristics:

- Depending on the surroundings, the brightness of the light source may decline. The brightness declines a lot when the temperature gets too high.
- The brightness of the light source declines the longer it is used. You can use the **Light Output** setting to change the relationship between usage time and the decline in brightness.

1. Turn on the projector and switch to the image source you want to use.
2. Press the **Light Output** button on the remote control.

Note: You can also access this setting from the projector's Operation menu.

3. Use the left and right arrow buttons to adjust the brightness.

Note: Press the **Default** button on the remote control to return to the default setting.

4. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Using Basic Projector Features](#)

Turning On Dynamic Contrast

You can turn on the **Dynamic Contrast** setting to automatically optimize the image luminance. This improves the image contrast based on the brightness of the content you project.

1. Turn on the projector and switch to the image source you want to use.

2. Press the **Menu** button.
3. Select the **Image** menu and press **Enter**.
4. Select the **Dynamic Contrast** setting, choose one of the following options, and press **Enter**:
 - **Normal** to adjust brightness at the standard speed.
 - **High Speed** to adjust brightness as soon as the scene changes.
5. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Using Basic Projector Features](#)

Adjusting the Color Temperature

You can change the overall color tone if the image contains a bluish or reddish tone.

1. Turn on the projector and display an image.
2. Press the **Menu** button.
3. Select the **Image** menu and press **Enter**.
4. Select **White Balance** and press **Enter**.
5. Select the **Color Temp.** setting and press **Enter**.

6. Use the left and right arrow buttons to adjust the color temperature. Higher values increase the blue tint, and lower values increase the red tint.

Note: The temperature range is from 3200 K to 10000 K for the Natural color mode, or 0 to 13 for other color modes. Press the **Default** button on the remote control to return to the default setting.

7. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Using Basic Projector Features](#)

Adjusting the RGB Offset and Gain

You can adjust the brightness of darker and brighter areas of the image by adjusting the **Offset** and **Gain** settings for the individual image colors.

Note: These settings should be set by a professional color calibrator using specialized color calibration tools in a controlled lighting environment.

1. Turn on the projector and display an image.
2. Press the **Menu** button.
3. Select the **Image** menu and press **Enter**.
4. Select **White Balance** and press **Enter**.
5. Select the **Custom** setting and press **Enter**.

6. Do the following as necessary for each color (Red, Green, and Blue):
 - To adjust the brightness of dark areas, adjust the **Offset** setting.
 - To adjust the brightness of bright areas, adjust the **Gain** setting.

Higher values make the image brighter but can decrease shading details, while lower values make the image darker but can increase the visibility of details.

Note: Press the **Default** button on the remote control to return to the default setting.

7. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Using Basic Projector Features](#)

Adjusting Gamma

You can correct differences in projected image colors that occur between different image sources.

Note: These settings should be set by a professional color calibrator using specialized color calibration tools in a controlled lighting environment.

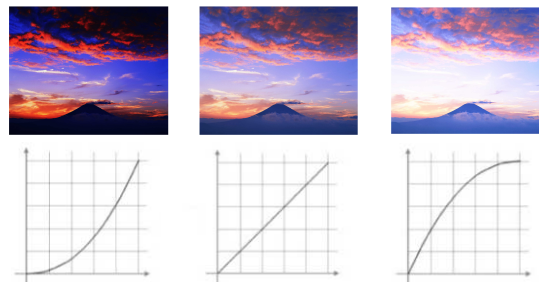

Note: To optimize the color tone according to the scene and obtain a more vivid image, adjust the **Scene Adaptive Gamma** setting in the projector's Image menu.

1. Turn on the projector and switch to the image source you want to use.
2. Press the **Menu** button.
3. Select the **Image** menu and press **Enter**.
4. Select **Gamma** and press **Enter**.

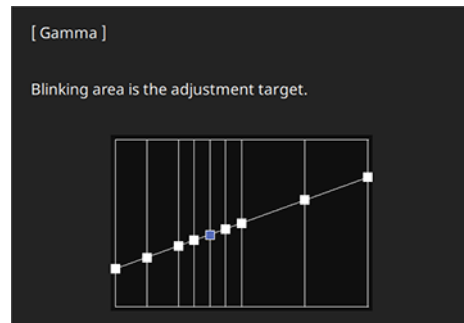

The projected image freezes.

5. Select and adjust the correction value.

When you select a smaller value, you can reduce the overall brightness of the image to make the image sharper. When you select a larger value, the dark areas of images become brighter, but the color saturation for lighter areas may become weaker.

6. If you want to make finer adjustments, select **Custom** and press **Enter**.

7. Press the left or right arrow button to select the tone you want to change, then press the up or down arrow button to adjust the tone and press **Enter**.

Note: Select **Reset** to reset the Gamma settings.

8. Press **Menu** or **Esc** to exit the menus.

Adjusting the Hue, Saturation, and Brightness

You can adjust the hue, saturation, and brightness settings for individual image colors.

Note: These settings should be set by a professional color calibrator using specialized color calibration tools in a controlled lighting environment.

1. Turn on the projector and switch to the image source you want to use.

2. Press the **RBGCMY** button on the remote control.

Note: You can also access this setting from the projector's Image menu.

3. Select the color to adjust and press **Enter**.

The selected color fills the screen and the adjustment menu appears.

4. Do the following as necessary for each setting:
 - To adjust the overall hue of the color (bluish, greenish, reddish), adjust the **Hue** setting.
 - To adjust the overall vividness of the color, adjust the **Saturation** setting.
 - To adjust the overall brightness of the color, adjust the **Brightness** setting.

5. Press **Menu** or **Esc** to exit the menus.

Operating Connected Devices Using the HDMI Link Features

You can use the remote control to control certain features of devices connected to the projector's HDMI ports.

Note: The connected device and cable must meet the HDMI CEC standard. Up to three devices can be connected at the same time.

1. Press the **HDMI Link** button on the remote control.

Note: You can also access this setting from the projector's Signal I/O menu.

2. Select the **HDMI Link** setting and press **Enter**.
3. Select **On** and press **Enter**.

4. Select **Device Connections** and press **Enter**.
5. Select the device you want to control and project images from and press **Enter**.

Note: A linked device is indicated with a blue mark. The device name is blank if it cannot be acquired.

6. Press **Esc** to return to the previous menu.
7. Select the following HDMI Link options as necessary:
 - **Power On Link:** Select what happens when you turn on the projector or linked device. Select **PJ - > Device** or **Bidirectional** to turn the linked device on when the projector is turned on, or **Device - > PJ** or **Bidirectional** to turn the projector on when the linked device is turned on.
 - **Power Off Link:** Select whether linked devices are turned off when the projector is turned off. This option only works when the connected device's CEC power link function is enabled.

Note: Some linked devices and their functions may not operate, even if they meet the HDMI CEC standard. See the device's documentation for more information.

8. Press **Menu** or **Esc** to exit the menus.

Shutting Off the Picture Temporarily

You can temporarily turn off the projected picture if you want to redirect your audience's attention during a presentation. Any video action continues to run, however, so you cannot resume projection at the point that you stopped it.

1. Press the **Blank** button on the remote control to temporarily stop projection.

2. To turn the picture back on, press the **Blank** button again.

Parent topic: [Adjusting Projector Features](#)

Projector Security Features

You can secure your projector to deter theft or prevent unintended use by setting up the following security features:

- Lens lock to prevent changing the zoom, focus, or lens shift settings.
- Button lock security to block operation of the projector using the buttons on the control panel.
- Security cabling to physically cable the projector in place.

[Locking the Projector's Lens Settings and Buttons](#)

[Installing a Security Cable](#)

Parent topic: [Adjusting Projector Features](#)

Locking the Projector's Lens Settings and Buttons

You can lock the buttons on the projector's control panel to prevent anyone from using the projector. You can also lock the zoom, focus, and lens shift settings to prevent them from being adjusted.

Note: You can use the remote control to control the projector when the control panel buttons are locked.

1. Press the **Menu** button.
2. Select the **Management** menu and press **Enter**.

| | |
|-----------------------|--|
| Frequently Used Items | Management |
| Image | Lens Lock Off |
| Signal I/O | Child Lock Off |
| Installation | Control Panel Lock Off |
| Display | Color Uniformity |
| Operation | Log Save Destination USB and Internal Memory |
| Management | Batch Setup Range |
| Network | Language  English |
| Memory | Information |
| Initial/All Settings | Display Status |
| | Reset Management Settings |
| | Network |
| | Wired LAN Info. |
| | Network Settings |
| | Reset Network Settings |
| | Memory |
| | Image |
| | Lens Position |

3. Select one of these lock types and press **Enter**:
 - To lock the zoom, focus, and lens shift settings, select **Lens Lock**.
 - To lock the projector's power button, select **Child Lock**. To turn the projector on, you must press the power button for longer than three seconds. You must restart the projector to enable this lock setting.

Note: **Child Lock** does not prevent the projector from turning on when the power cord is connected if the **Direct Power On** setting is enabled in the projector's Operation menu.

- To lock all buttons, select **Control Panel Lock > Full Lock**.
- To lock all buttons except the power button, select **Control Panel Lock > Except for Power**.

Note: A message is displayed on the screen if any control panel buttons are pressed while this setting is enabled.

You see a confirmation prompt.

4. Select **Yes** and press **Enter**.

Follow the instructions in these sections to use your projector's advanced image adjustments.

Note: Not all adjustments may be available depending on the projection mode and input signal.

[Using Frame Interpolation](#)

[Creating Image Presets](#)

[Adjusting the Color Convergence \(Panel Alignment\)](#)

[Adjusting the Color Tone \(Color Uniformity\)](#)

Parent topic: [Adjusting Projector Features](#)

Using Frame Interpolation

You can use the projector's Frame Interpolation feature to smooth fast-moving video by comparing consecutive image frames and inserting an intermediate image frame between them.

Note: This feature is only available when **Image Processing** is set to **Fine** in the projector's Signal I/O menu and 4K 100/120Hz signals are not being projected.

1. Turn on the projector and switch to the image source you want to use.
2. Press the **Frame Int** button on the remote control.

Note: You can also access this setting from the projector's Image menu.

3. Select the level of interpolation and press **Enter**.

4. Press **Menu** or **Esc** to exit the menus.

Note: If your resulting images contain noise, turn off the **Frame Interpolation** setting.

Creating Image Presets

You can quickly optimize your projected image by selecting image adjustment settings and saving them as a preset you can reuse later. You can save up to five presets.

1. Turn on the projector and switch to the image source you want to use.
2. Press the **Image Enh** button on the remote control.

Note: You can also access this setting from the projector's Image menu.

3. Select the preset you want to adjust and press **Enter**.

4. Select **Return** or press **Esc** to return to the previous menu.
5. Adjust each setting for the preset as necessary.

- Adjust the **Noise Reduction** setting to reduce flickering in images.
- Adjust the **MPEG Noise Reduction** setting to reduce the noise or artifacts seen in MPEG video.
- Adjust the **Super-resolution** setting to reduce blurring when projecting low-resolution images.
- Adjust the **Auto Contrast Enhancement** setting to create a clearer and sharper image by automatically adjusting the contrast.

The setting values in the preset option are overwritten as you make changes.

6. Press **Menu** or **Esc** to exit the menus.

To quickly switch between image presets, press the **Image Enh** button on the remote control, select an image preset to use, and press **Enter**.

[Image Quality Settings - Image Menu](#)

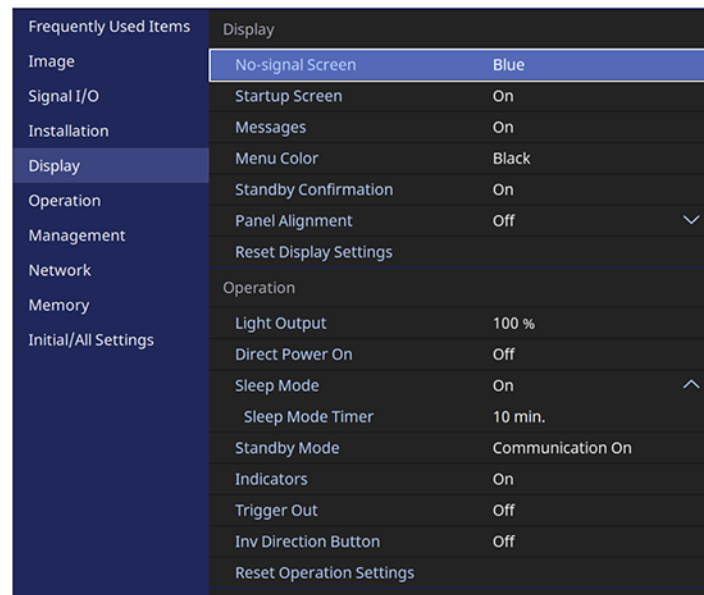

Adjusting the Color Convergence (Panel Alignment)

You can use the Panel Alignment feature to manually adjust the color convergence (the alignment of the red and blue colors) in the projected image. You can adjust the pixels horizontally and vertically in increments of eighths within a range of ± 3 pixels. Image quality may decline after performing Panel Alignment.

Note: You can adjust only the red or blue color convergence. Green is the standard color panel and cannot be adjusted.

Note: Allow your projector to warm up for at least 10 to 15 minutes and make sure the image is in focus before you use the Panel Alignment feature. For best results, project an image sized at least 80 inches (203 cm) diagonally in a dark room and on a projection surface that is not colored or textured.

1. Turn on the projector.
2. Press the **Menu** button.
3. Select the **Display** menu and press **Enter**.

4. Select the **Panel Alignment** setting and press **Enter**.

5. Select **On** and press **Enter**.
6. Press **Esc** to return to the previous menu.
7. Select the **Select Color** setting and choose one of the following:
 - **R** to adjust the red color convergence.
 - **B** to adjust the blue color convergence.
8. Select the **Pattern Color** setting and press **Enter**.
 - Select **R/G/B** to display the grid in white.
 - Select **R/G** to display the grid in yellow.
 - Select **G/B** to display the grid in cyan.
9. Select **Start Adjustments** and press **Enter**.

10. Select one of the following:
 - Select **Shift the whole panel** to adjust the whole panel at the same time. (This is not recommended, as usually only certain areas of the panel need to be adjusted.) Go to the next step.
 - Select **Adjust the four corners** to adjust the corners of the panel one at a time. (This is recommended in most cases.) Skip to step 15.
11. Press **Enter**.

You see a screen like this:

12. Use the arrow buttons on the remote control to adjust the color alignment of the color you selected for the **Select Color** setting.
13. When you are finished adjusting the screen, press **Enter**.

Note: The **Shift the whole panel** option affects the grid lines in the entire screen. To fine-tune your adjustments, continue with the next steps.

14. Select **Adjust the four corners** and press **Enter**. (Otherwise, select **Exit** and press **Enter**.)
15. Use the arrow buttons on the remote control to adjust the color alignment in the corner of the screen highlighted by the orange box.

You should not see any red or blue lines after correctly making the adjustments.

16. Press **Enter** to move to the next corner of the screen.
17. When you are finished adjusting each corner of the screen, press **Enter**.

18. Do one of the following:
 - If your projector's panel alignment is now correct, select **Exit** and press **Enter** to return to the Panel Alignment menu.
 - If your projector needs additional panel alignment, select **Select intersection and adjust** and press **Enter**. Use the arrow keys on the remote control to highlight the corner of any misaligned box on the screen, press **Enter**, make any necessary adjustments and press **Enter** again. Repeat this step as necessary for the other intersections.

Note: To save the adjusted panel alignment setting after exiting, select **Memory > Save Memory** in the Display menu.

Parent topic: [Using Advanced Image Adjustment Features](#)

Adjusting the Color Tone (Color Uniformity)

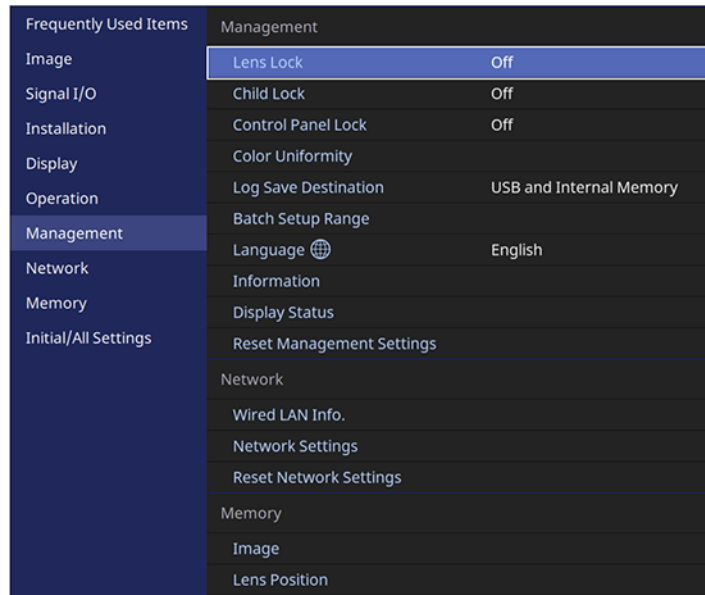

You can use the Color Uniformity feature to manually adjust the color tone balance in the projected image.

Note: These settings should be set by a professional color calibrator using specialized color calibration tools in a controlled lighting environment.

Note: The color tone may not be uniform even after adjusting the color uniformity.

1. Press the **Menu** button.

2. Select the **Management** menu and press **Enter**.

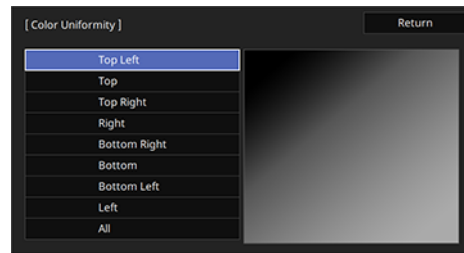

3. Select the **Color Uniformity** setting and press **Enter**.

4. Select the **Color Uniformity** setting again and press **Enter**.
5. Select **On** and press **Enter**.
6. Press **Esc** to return to the previous menu.
7. Select the **Adjustment Level** setting and press **Enter**.
8. Press the right and left arrow buttons to adjust the level and press **Esc**.

Note: There are eleven adjustment levels, from white to gray to black. You can individually adjust each level.

9. Select the **Start Adjustments** setting and press **Enter**.

10. Select the area of the screen that you want to adjust and press **Enter**.

Note: Adjust the outer areas first, then select **All** to adjust the entire screen.

11. Select the color you want to adjust. Use the left arrow button to weaken the color tone and the right arrow button to strengthen the color tone.

Note: The adjustment screen changes each time you press **Enter**.

12. Press **Esc** to return to the area selection screen.
13. Repeat these steps for each area you want to adjust and for each adjustment level.
14. Press **Menu** or **Esc** to exit the menus.

Parent topic: [Using Advanced Image Adjustment Features](#)

Saving Settings to Memory and Using Saved Settings

You can save customized settings and select the saved settings whenever you want to use them.

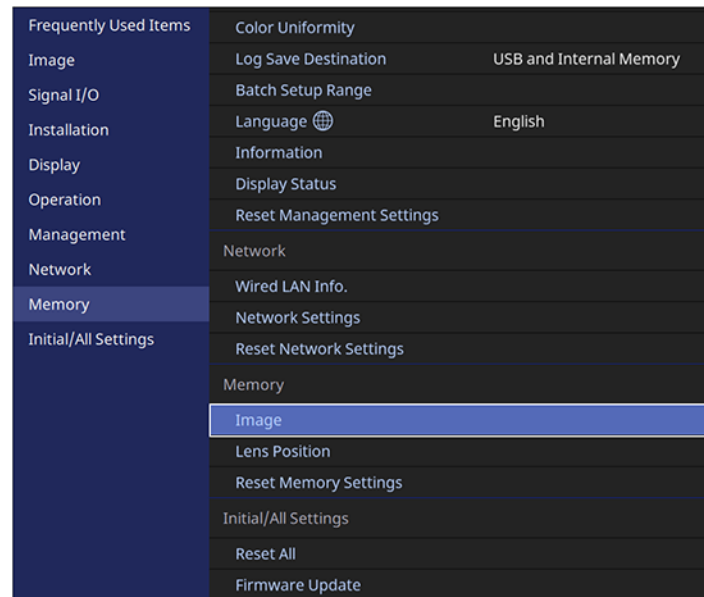

1. Turn on the projector and display an image.

2. Press the **Memory** button on the remote control.

Note: You can also access these settings from the projector's Memory menu.

3. Select one of the following options:

- **Image:** saves your current Image menu settings for each color mode along with the Blanking setting for the projected image (up to 10 memories)

- **Lens Position:** saves your current focus, zoom, and lens shift settings (up to 10 memories); load the saved settings by pressing the **Lens1** or **Lens2** button on the remote control

Note: Some slight adjustments may be needed after switching to a different lens position memory.

Note: To clear all saved memories, select **Reset Memory Settings**.

4. Select one of the following options:

- **Save Memory:** saves your current settings to memory (10 memories with different names are available)

Note: A memory name that has already been used is indicated by a blue mark. Saving over a previously saved memory overwrites the settings with your current settings.

- **Load Memory:** overwrites your current settings with saved settings
- **Erase Memory:** erases the selected memory settings
- **Rename Memory:** renames a saved memory
- **Reset:** resets the name and settings of a saved memory

5. Press **Menu** or **Esc** to exit the menus.

[Transferring Settings from a Computer](#)

Parent topic: [Adjusting Projector Features](#)

Saving Settings to a USB Flash Drive

You can save the projector settings you want to transfer to a USB flash drive.

Note: Use an empty flash drive. If the drive contains other files, the transfer may not complete correctly. The flash drive must use the FAT 16/32 format and cannot have any security features.

1. Turn off the projector and unplug the power cord from the projector's power inlet.
2. Insert the flash drive into the **USB-A** port.

Note: Connect the flash drive directly to the projector. Do not use a hub or your settings may not be saved correctly.

3. Press and hold the **Esc** button on the control panel or remote control as you connect the power cord to the projector's power inlet.
4. When all of the projector lights turn on, release the **Esc** button.

The lights flash to indicate that settings are transferring to the flash drive. When the lights stop flashing, the power light turns blue and the projector enters standby mode.

Caution: Do not unplug the power cord or remove the flash drive while the lights are flashing. This could damage the projector.

5. Once the projector enters standby mode, remove the flash drive.

Note: If the projector does not enter standby mode and the lights continue flashing, see the link below for a solution.

Transferring Settings from a USB Flash Drive

After saving projector settings to a USB flash drive, you can transfer them to another projector of the same model.

Note: Make sure the USB flash drive contains only a single settings transfer from another projector of the same model. The settings are contained in a file called **pjconfdata.bin**. If the drive contains other files, the transfer may not complete correctly.

Do not adjust image settings on a projector until after you transfer settings to it. Otherwise, you may have to repeat your adjustments.

1. Turn off the projector and unplug the power cord from the projector's power inlet.
2. Insert the flash drive into the **USB-A** port.

Note: Connect the flash drive directly to the projector. Do not use a hub or your settings may not be saved correctly.

3. Press and hold the **Menu** button on the control panel or remote control as you connect the power cord to the projector's power inlet.
4. When all of the projector lights turn on, release the **Menu** button.

The lights flash to indicate that settings are transferring to the projector. When the lights stop flashing, the power light turns blue and the projector enters standby mode.

Caution: Do not unplug the power cord or remove the flash drive while the lights are flashing. This could damage the projector.

5. Once the projector enters standby mode, remove the flash drive.

Note: If the projector does not enter standby mode and the lights continue flashing, see the link below for a solution.

Saving Settings to a Computer

You can save the projector settings you want to transfer to a computer.

Your computer must be running one of the following operating systems:

- Windows 8.1 or later
- macOS 10.13.x or later

1. Turn off the projector and unplug the power cord from the projector's power inlet.
2. Connect a USB cable to your projector's **Service** port.
3. Connect the other end to any available USB port on your computer.
4. Press and hold the **Esc** button on the control panel or remote control as you connect the power cord to the projector's power inlet.
5. When all of the projector lights turn on, release the **Esc** button.

The projector shows up as a removable disk on your computer.

6. Open the removable disk and copy the **pjconfdata.bin** file to your computer.
7. Once the file has copied, do one of the following:
 - **Windows:** Open the **My Computer**, **Computer**, **Windows Explorer**, or **File Explorer** utility. Right-click the name of your projector (listed as a removable disk) and select **Eject**.
 - **Mac:** Drag the removable disk icon for your projector from the desktop into the trash.

The projector turns off when you disconnect the USB cable.

Note: If the projector does not turn off and the lights continue flashing, see the link below for a solution.

2. Press the up or down arrow button to move through the menus listed on the left. The settings for each menu are displayed on the right.

Note: The available settings depend on the current input source, resolution, or other menu settings.

3. To change settings in the displayed menu, press **Enter**.
4. Press the up or down arrow button to move through the settings.
5. To return all the menu settings to their default values, select the **Initial/All Settings** menu and select **Reset All**.
6. When you finish changing settings on a menu, press **Esc**.
7. Press **Menu** or **Esc** to exit the menus.

Note: The  icon indicates that a setting contains sub-settings.

Image Quality Settings - Image Menu

Settings on the Image menu let you adjust the quality of your image for the input source you are currently using. The available settings depend on the currently selected color mode and input source.

| Frequently Used Items | Image | |
|-----------------------|----------------------|--------------|
| Image | Color Mode | Presentation |
| Signal I/O | Brightness | 50 |
| Installation | Contrast | 50 |
| Display | Color Saturation | 50 |
| Operation | Tint | 50 |
| Management | Sharpness | |
| Network | White Balance | |
| Memory | Frame Interpolation | Off |
| Initial/All Settings | Dynamic Contrast | Off |
| | Deinterlacing | Off |
| | Image Enhancement | |
| | Scene Adaptive Gamma | 5 |
| | Gamma | 0 |
| | RGBCMY | |
| | Reset to Defaults | |
| | Source | Computer1 |
| | Aspect | Auto |
| | Reset to Defaults | |

Color Mode Settings

| Setting | Options | Description |
|-------------------------|---------------------------------------|--|
| Color Mode | See the list of available Color Modes | Adjusts the vividness of image colors for various image types and environments |
| Brightness | Varying levels available | Lightens or darkens the overall image |
| Contrast | Varying levels available | Adjusts the difference between light and dark areas of the image |
| Color Saturation | Varying levels available | Adjusts the intensity of the image colors |

| Setting | Options | Description |
|----------------------|--|---|
| Tint | Varying levels available | Adjusts the balance of green to magenta tones in the image |
| Sharpness | Standard Thin Line Enhancement Thick Line Enhancement | Adjusts the sharpness or softness of image details Standard: enhances outlines for the entire image; also adjusts the Thin Line Enhancement and Thick Line Enhancement settings (defaults to 5) Thin Line Enhancement: enhances details such as hair and clothing patterns Thick Line Enhancement: enhances backgrounds and larger elements |
| White Balance | Color Temp. G-M Correction Custom Grayscale | Sets the overall color tone of the image Color Temp.: sets the color temperature according to the selected color mode; lower values tint the image red, and higher values tint the image blue G-M Correction: makes fine adjustments to the color tone; higher values tint the image green and lower values tint the image red Custom: adjusts the individual RGB components of the offset and gain Grayscale: adjusts the red, green, blue, and brightness for the selected adjustment level |

| Setting | Options | Description |
|----------------------------|--|--|
| Frame Interpolation | Off Low Normal High | Adjusts the smoothness of image movement (only available when Image Processing is set to Fine in the Signal I/O menu and 4K 100/120Hz signals are not being projected) |
| Dynamic Contrast | Off Normal High Speed | Adjusts the projected luminance based on the image brightness |
| Deinterlacing | Off Video Film/Auto | Sets whether to convert interlaced-to-progressive signals for certain video image types (only available when Image Processing is set to Fine in the Signal I/O menu) Off : for fast-moving video images Video : for most video images Film/Auto : for movies, computer graphics, and animation |

| Setting | Options | Description |
|-----------------------------|----------------------------------|---|
| Image Enhancement | Image Preset Mode | Selects preset Image Enhancement settings |
| | Noise Reduction | Reduces flickering in analog images (only available when Image Processing is set to Fine in the Signal I/O menu and 4K 100/120Hz signals are not being projected) |
| | MPEG Noise Reduction | Reduces the noise or static in MPEG video (only available when Image Processing is set to Fine in the Signal I/O menu and 4K 100/120Hz signals are not being projected) |
| | Super-resolution | Sharpens blurred images when projecting low-resolution images Fine Line Adjust: enhances the contrast and outlines of complicated images Soft Focus Detail: enhances the contrast and outlines of smooth backgrounds |
| | Auto Contrast Enhancement | Automatically adjusts the contrast of the projected image to create a clearer and sharper image |
| | Reset | Resets all settings in the Image Enhancement menu |
| Dynamic Tone Mapping | Off On | Automatically adjusts to the optimum HDR level according to the scene (only available when Dynamic Range is set to Auto and Signal Status is set to either HDR10 or HDR10+ , or when Dynamic Range is set to HDR10/HDR10+) |

| Setting | Options | Description |
|-----------------------------|---------------------------------|---|
| Scene Adaptive Gamma | Varying levels available | Adjusts the coloring and obtains a more vivid image depending on the scene. Select a larger number to enhance contrast. |
| Gamma | -2 to 2 Custom | Adjusts the colors by selecting one of the gamma correction values or referring to a gamma graph |
| RGBCMY | Varying levels available | Adjusts the hue, saturation, and brightness for each color |
| Reset to Defaults | — | Resets all settings for the Color Mode currently selected |

Note: The **Brightness** setting does not affect laser brightness. To change the laser brightness mode, use the **Light Output** setting.

Input Source Settings

To change settings for an input source, make sure the source is connected and select that source.

| Setting | Options | Description |
|--------------------------|---|---|
| Source | — | Displays the current input source selected |
| Aspect | See the list of available aspect ratios | Sets the aspect ratio (width-to-height ratio) |
| Reset to Defaults | — | Resets all settings for the currently selected input source |

Note: Select **Reset Image Settings** to reset all settings on the Image menu to their default values.

[Updating the Firmware](#)

Maintaining and Transporting the Projector

Follow the instructions in these sections to maintain your projector and transport it from place to place.

[Projector Maintenance](#)

[Replacing the Remote Control Batteries](#)

[Updating the Firmware](#)

[Transporting the Projector](#)

Projector Maintenance

Your projector needs little maintenance to keep working at its best.

You may need to clean the lens periodically, and clean the air filter and air vents to prevent the projector from overheating due to blocked ventilation.

The only parts you should replace are the air filter and remote control batteries. If any other part needs replacing, contact Epson or an authorized Epson servicer.

This projector uses a sealed laser light source which does not need servicing and cannot be replaced.

Warning: Before cleaning any part of the projector, turn it off, unplug the power cord, and let it cool down. Never open any cover on the projector, except as specifically explained in this manual. Dangerous electrical voltages in the projector can injure you severely.

Warning: Do not try to service this product yourself, except as specifically explained in this manual. Refer all other servicing to Epson qualified servicers.

[Optional Equipment and Replacement Parts](#)

Cleaning the Lens

Clean the projector's lens periodically, or whenever you notice dust or smudges on the surface. Make sure you turn off the projector and unplug the power cord before cleaning the lens.

- To remove dust or smudges, gently move the shutter to the side and wipe the lens with lens-cleaning paper or a soft, dry lens-cleaning cloth. After cleaning, close the shutter.
- To remove stubborn smudges, moisten a soft, lint-free cloth with lens cleaner and gently wipe the lens. Do not spray any liquid directly on the lens.

Warning: Do not use a lens cleaner that contains flammable gas. The high heat generated by the projector may cause a fire. Use a vacuum cleaner or a hand-held air blower to remove any dust and lint on the lens.

Caution: Do not wipe the lens immediately after turning off the light source; otherwise, it could be damaged. Do not use glass cleaner or any harsh materials to clean the lens and do not subject the lens to any impacts; you may damage it. Do not use canned air, or the gases may leave a residue. Avoid touching the lens with your bare hands to prevent fingerprints on or damage to the lens surface.

Parent topic: [Projector Maintenance](#)

Cleaning the Projector Case

Before cleaning the projector case, turn off the projector and unplug the power cord.

- To remove dust or dirt, use a soft, dry, lint-free cloth.
- To remove stubborn dirt, use a soft cloth moistened with water and mild soap. Do not spray liquid directly on the projector.

Caution: Do not use wax, alcohol, benzine, paint thinner, or other chemicals to clean the projector case. These can damage the case. Do not use canned air, or the gases may leave a flammable residue.

Parent topic: [Projector Maintenance](#)

Air Filter and Vent Maintenance

Regular filter maintenance is important to maintaining your projector. Your Epson projector is designed with an easily accessible, user-replaceable filter to protect your projector and make regular maintenance simple. Filter maintenance intervals will depend on the environment.

If regular maintenance is not performed, your Epson projector will notify you when the temperature inside the projector has reached a high level. Do not wait until this warning appears to maintain your projector filter as prolonged exposure to high temperatures may reduce the life of your projector or laser.

Damage due to the failure to properly maintain the projector or its filter may not be covered by the projector's Limited Warranty.

[Optional Equipment and Replacement Parts](#)

Cleaning the Air Filter

You need to clean the projector's air filter in the following situations:

- The filter or vents get dusty.
- You see a message telling you to clean it.

Note: It is recommended that you clean the air filter every 5,000 hours. Clean it more often if the projector is in a dusty environment.

1. Turn off the projector and unplug the power cord.
2. Carefully remove the dust from the air filter cover with a vacuum or brush.

Note: Canned or compressed air is not recommended as it can blow dust into the projector and it may leave a flammable residue.

3. Loosen the screws and remove the air filter cover.

4. Raise the stopper.

5. Pull the air filter out of the projector.

6. Tap each side of the air filter 4 to 5 times to shake off any excess dust.

Caution: Do not use excessive force when tapping the air filter, or it may crack and become unusable. Do not rinse the air filter in water, or use any detergent or solvent to clean it. Do not use canned air; the gases may leave a residue, or push dust and debris into the projector's optics or other sensitive areas.

7. Vacuum the front of the air filter (the side with the tabs) to remove any remaining dust.

Note: If dust is difficult to remove or the air filter is damaged, replace the air filter.

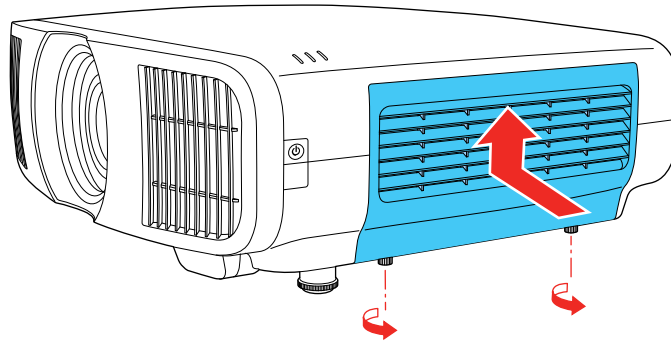

8. Place the air filter back in the projector as shown.

9. Lower the stopper and press until it clicks into place.

10. Replace the air filter cover and tighten the screws as shown.

Parent topic: [Air Filter and Vent Maintenance](#)

Related tasks

[Replacing the Air Filter](#)

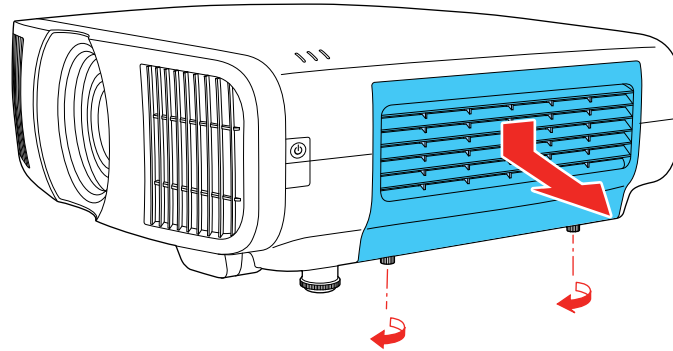

Replacing the Air Filter

You need to replace the air filter in the following situations:

- After cleaning the air filter, you see a message telling you to clean or replace it
- The air filter is torn or damaged

You can replace the air filter while the projector is mounted to the ceiling or placed on a table.

1. Turn off the projector and unplug the power cord.
2. Loosen the screws and remove the air filter cover.

3. Raise the stopper.

4. Pull the air filter out of the projector.

Note: Air filters contain polypropylene. Dispose of used air filters according to local regulations.

5. Place the new air filter in the projector as shown.

6. Lower the stopper and press until it clicks into place.

7. Replace the air filter cover and tighten the screws as shown.

Parent topic: [Air Filter and Vent Maintenance](#)

[Optional Equipment and Replacement Parts](#)

Replacing the Remote Control Batteries

The remote control uses two AA manganese or alkaline batteries. Replace the batteries as soon as they run out.

Caution: Use only the type of batteries specified in this manual. Do not install batteries of different types, or mix new and old batteries.

1. Remove the battery cover as shown.

2. Remove the old batteries.

Warning: If the battery fluid has leaked, wipe it away with a soft cloth and avoid getting the fluid on your hands. If it gets on your hands, wash them immediately to avoid injury.

3. Insert the batteries with the + and – ends facing as shown.

Warning: Make sure the batteries are inserted in the correct positions. If the batteries are not inserted correctly, they could explode or leak, causing a fire, injury, or damage to the product.

4. Replace the battery cover and press it down until it clicks into place.

Warning: Dispose of used batteries according to local regulations. Do not expose batteries to heat or flame. Keep batteries out of the reach of children; they are choking hazards and are very dangerous if swallowed.

Parent topic: [Maintaining and Transporting the Projector](#)

Updating the Firmware

You can update the projector's firmware using a USB storage device or a computer and a USB cable.

If a firmware update is available for your product, you can select the **Firmware Update** option in the projector's Initial/All Settings menu. The projector enters firmware update mode and is ready to perform a firmware update. If a firmware update file is not found, the projector enters standby mode.

You can download your firmware update file from your product's support page or use the Epson Projector Management software to check for firmware updates for your product.

[Updating Projector Firmware Using a USB Storage Device](#)

[Updating Projector Firmware Using a Computer and USB Cable](#)

Parent topic: [Maintaining and Transporting the Projector](#)

Updating Projector Firmware Using a USB Storage Device

You can update the projector's firmware using a USB storage device.

1. Download the projector firmware file from the Epson support website. Make sure it is the correct firmware file for your model.

Note: If the firmware file is not the correct file for your model, or if you renamed the file, the update will not start.

2. Copy the downloaded firmware file onto the root (top) folder of the USB storage device.

Note: Do not rename the firmware file. The USB device should be completely empty except for the firmware file and should be formatted in FAT format.

3. Turn on the projector.
4. Connect the USB storage device to the projector's **USB-A** port.
5. Press the **Menu** button, select **Initial/All Settings > Firmware Update** and press **Enter**.

6. Select **Yes** to start the firmware update.

Note: Do not disconnect the power cable or remove the USB storage device while the firmware is updating.

While the firmware is updating, all of the status indicators on the projector start flashing and the cooling fans run at high speed (this is normal). After the update is complete, the projector enters standby mode. If the **Direct Power On** setting is enabled, the projector restarts automatically.

Note: If all of the status indicators flash rapidly, the firmware update may have failed. Disconnect and reconnect the projector's power cord. If the indicators continue to flash even after reconnecting the power cord, unplug the cord from the electrical outlet and contact Epson Support.

After the update is complete, check the **Version** setting in the **Management > Information** menu to confirm that the firmware was updated successfully.

Parent topic: [Updating the Firmware](#)

[Projector Light Status](#)

Updating Projector Firmware Using a Computer and USB Cable

You can update the projector firmware using a computer and a USB cable.

Note: You need a USB Type A to USB Mini-B cable.

Your computer must be running one of the following operating systems when updating firmware:

- Windows 8.1 (32- and 64-bit)
- Windows 10 (32- and 64-bit)
- Windows 11 (64-bit)
- macOS 10.13.x (64-bit)
- macOS 10.14.x (64-bit)
- macOS 10.15.x (64-bit)

1. Download the projector firmware file from the Epson support website. Make sure it is the correct firmware file for your model.

Note: If the firmware file is not the correct file for your model, or if you renamed the file, the update will not start.

2. Turn on the projector.
3. Connect the USB cable to the computer's USB port and to the projector's **Service** port.
4. Press the **Menu** button, select **Initial/All Settings > Firmware Update** and press **Enter**.
5. Select **Yes** to start the firmware update.

Note: Do not disconnect the power cable or remove the USB cable while the firmware is updating.

All of the status indicators on the projector turn on and the projector enters firmware update mode. The projector appears as a removable drive on the connected computer.

Note: If the projector is in firmware update mode for longer than 20 minutes before a firmware update starts, it automatically shuts off. Return to step 2 and repeat the process.

6. Copy the downloaded firmware file onto the root (top) directory of the projector's removable drive.

Note: Do not rename the firmware file.

7. Safely remove the projector's removable drive from the computer, then disconnect the USB cable from the projector.

The firmware update starts.

While the firmware is updating, the status indicators on the projector start flashing and the cooling fans run at high speed (this is normal). After the update is complete, the projector enters standby mode. If **Direct Power On** is enabled, the projector restarts automatically.

Note: If all status indicators flash rapidly, the firmware update may have failed. Disconnect and reconnect the projector's power cord. If the indicators continue to flash even after reconnecting the power cord, unplug the cord from the electrical outlet and contact Epson Support.

After the update is complete, check the **Version** setting in the **Management > Information** menu to confirm that the firmware was updated successfully.

Parent topic: [Updating the Firmware](#)

Transporting the Projector

The projector contains precision parts, some of which are glass. Follow these guidelines to transport, ship, or store the projector safely.

- Remove any equipment connected to the projector.
- Center the lens position using the **Lens** button.

Caution: If you transport the projector when the lens is not centered, the lens shift mechanism may be damaged.

- Make sure the lens shutter is closed.
- When transporting the projector a long distance or as checked luggage, pack it in a firm box with cushioning around it and mark the box "Fragile."
- When shipping the projector for repairs, place it in its original packing materials, if possible, or use equivalent materials with cushioning around the projector. Mark the box "Fragile."

Note: Epson shall not be liable for any damages incurred during transportation.

[Solutions to Sound Problems](#)

Parent topic: [Solving Problems](#)

Solutions When No Image Appears

If no image appears, try the following solutions:

- Check the status light to confirm the projector is operating normally.
- Press the **Blank** button on the remote control to see if the image was temporarily turned off.
- Make sure all necessary cables are securely connected and the power is on for the projector and connected video sources.
- Try using a shorter HDMI cable.
- Try connecting the video source directly to the projector.
- Press the projector's power button to wake it from standby or sleep mode. Also see if your connected computer is in sleep mode or displaying a blank screen saver.
- If you are projecting from a streaming device, make sure its power cable is connected to the **USB-A (5V---2.0A) port** on the projector. Turn on the connected streaming device or video source, and press the play button to start a video, if necessary.
- If your streaming device is connected to a soundbar or receiver, make sure you have selected the correct source on your soundbar or receiver.
- Make sure the connected device meets the HDMI CEC standard. See the documentation supplied with the device for more information. If necessary, set the CEC function for the connected device again and restart the device. Turn off the projector and the connected streaming device or video source, and then turn them back on.
- Turn off the projector and the connected streaming device or video source, and then turn them back on.
- Check the settings on the Signal I/O menu to make sure they are correct for the current video source.
- If you are projecting from a laptop computer, make sure it is set up to display on an external monitor.
- Make sure the computer's display resolution does not exceed the projector's resolution and frequency limits. If necessary, select a different display resolution for your computer. (See your computer manual for details.)
- Make sure you selected the correct **Signal Format** or **EDID** setting in the projector's Signal I/O menu, if available for your image source.

- When sending 18 Gbps images such as 4K 120 Hz, use an HDMI cable (ultra high-speed).
- If the other solutions do not solve the problem, reset all of the projector settings using the options on the **Initial/All Settings** menu.

Parent topic: [Solving Image or Sound Problems](#)

[Input Signal Settings - Signal I/O Menu](#)

Solutions When "No Signal" Message Appears

If the "No Signal" message appears, try the following solutions:

- Press a source button on the remote to select an available source. Wait a few seconds for an image to appear.
- Turn on the connected computer or video source, and press its play button to begin your presentation, if necessary.
- Check the connection from the projector to your video sources.
- If you are projecting from a laptop computer, make sure it is set up to display on an external monitor.
- If necessary, turn the projector and the connected computer or video source off and then on again.
- Try a different video cable.
- If you connected a streaming device, try a different power cable or use external power.
- If your streaming device is connected to a soundbar or receiver, make sure you have selected the correct source on your soundbar or receiver.
- If the other solutions do not solve the problem, reset all of the projector settings using the options on the **Initial/All Settings** menu.

[Displaying From a PC Laptop](#)

[Displaying From a Mac Laptop](#)

Parent topic: [Solving Image or Sound Problems](#)

Displaying From a PC Laptop

If you see the "No Signal" message when you display from a PC laptop, you need to set up the laptop to display on an external monitor.

1. On Windows 7 or later, hold down the Windows key and press **P** at the same time, then click **Duplicate**.

2. If the same image is not displayed by the laptop and projector, check the Windows **Display** utility to make sure the external monitor port is enabled and extended desktop mode is disabled. (See your computer or Windows manual for instructions.)
3. If necessary, check your video card settings and set the multiple display option to **Clone, Mirror, or Duplicate**.

Parent topic: [Solutions When "No Signal" Message Appears](#)

Displaying From a Mac Laptop

If you see the "No Signal" message when you display from a Mac laptop, you need to set up the laptop for mirrored display. (See your laptop manual for details.)

1. Open the **System Preferences** utility and select **Displays, Display, or Color LCD**.
2. Click the **Arrange or Arrangement** tab.
3. Select the **Mirror Displays** checkbox.

Parent topic: [Solutions When "No Signal" Message Appears](#)

Solutions When Only a Partial Image Appears

If only a partial computer image appears, try the following solutions:

- Try adjusting the image position using the **Lens** button on the remote control or control panel.
- Press the **Aspect** button on the remote control to select a different image aspect ratio.
- Check the **Blanking** setting in the Installation menu.
- Check your computer display settings to disable dual display and set the resolution within the projector's limits. (See your computer manual for details.)
- Check the resolution assigned to your presentation files to see if they are created for a different resolution than you are projecting in. (See your software help for details.)
- Make sure the lens shutter is fully open.
- Make sure you selected the correct **Projection** setting in the Installation menu.

Parent topic: [Solving Image or Sound Problems](#)

[Installation Settings - Installation Menu](#)

[Available Image Aspect Ratios](#)

Solutions When the Image is Not Rectangular

If the projected image is not evenly rectangular, try the following solutions:

- Place the projector directly in front of the center of the screen, facing it squarely, if possible.
- If you are mounting the projector from the ceiling, use the adjustment controls on the mount at the time of installation.
- Adjust the image shape using the **Geometry Correction** menu settings (**Menu > Installation > Geometry Correction**).
- Adjust the **H/V-Keystone** setting to correct the image shape.
- Adjust the **Quick Corner** setting to correct the image shape.
- Adjust the **Point Correction** setting to correct slight distortion that affects a portion of the screen.

Solutions When the Image Contains Noise or Static

If the projected image seems to contain electronic interference (noise) or static, try the following solutions:

- Check the cables connecting your computer or video source to the projector. They should be:
 - Separated from the power cord to prevent interference
 - Securely connected at both ends
 - Not connected to an extension cable
- Make sure you selected the correct **Signal Format** or **EDID** settings in the projector's Signal I/O menu, if available for your image source.
- Adjust the **Noise Reduction**, **MPEG Noise Reduction**, and **Deinterlacing** settings in the projector's Image menu.
- Adjust the **Blanking** setting in the Installation menu to hide noise or static on the edges of the projected image.

- Adjust the **HDMI IN EQ Level** setting in the projector's Signal I/O menu. Change the setting to **Low** if you are using a short HDMI cable, or change the setting to **High** if you are using a longer HDMI cable.
- Select a computer video resolution and refresh rate that are compatible with the projector.
- If you adjusted the image shape using the projector controls, try decreasing the **Sharpness** setting to improve image quality.
- If you connected an extension power cable, try projecting without it to see if it caused interference in the signal.
- If you connected an A/V system that does not support eARC/ARC to the **HDMI2 (eARC/ARC)** port, the image may be distorted.

Solutions When the Image is Fuzzy or Blurry

If the projected image is fuzzy or blurry, try the following solutions:

- Adjust the image focus.
- Clean the projector lens.
- Check the lens for condensation.

Note: To avoid condensation on the lens after bringing the projector in from a cold environment, let the projector warm up to room temperature before using it.

- Position the projector close enough to the screen, and directly in front of it.
- Adjust the **Sharpness** setting to improve image quality.
- If you are projecting from a computer, adjust the computer's resolution to match the projector's native resolution, if possible.

Solutions When the Image Brightness or Colors are Incorrect

If the projected image is too dark or light, or the colors are incorrect, try the following solutions:

- Press the **Color Mode** button on the remote control to try different color modes for the image and environment.
- Check your video source settings.
- Adjust the available settings on the Image menu for the current input source, such as **Brightness**, **Contrast**, **Tint**, **Color Saturation**, and **RGBCMY**. RGBCMY should be set by a professional color calibrator using specialized color calibration tools in a controlled lighting environment.
- Make sure you selected the correct **Signal Format** or **EDID** setting in the Signal I/O menu, if available for your video source.
- Make sure you selected the correct **Dynamic Range** setting in the Signal I/O menu.
- For HDR images, set the **Dynamic Range** setting to **Auto**.
- Make sure all the cables are securely connected to the projector and your video device. If you connected long cables, try connecting shorter cables.
- Position the projector close enough to the screen.

Solutions to Sound Problems

If there is no sound when you expect it or the volume is too low or high, try the following solutions:

- Check your computer or video source to make sure the volume is turned up and the audio output is set for the correct source.
- Check the cable connection between the projector and your video source.
- If you are using an eARC/ARC-compatible A/V system, try the following solutions:
 - Make sure your A/V system is connected to the projector's eARC/ARC compatible HDMI port.
 - Make sure the cable meets the HDMI CEC standard.
 - Make sure the connected A/V system meets the HDMI CEC standard. See the documentation supplied with the device for more information.

Parent topic: [Solving Problems](#)

Solutions to Projector Power or Shut-Off Problems

If the projector does not come on when you press the power button or it shuts off unexpectedly, try the following solutions:

- Make sure the power cord is securely connected to the projector and to a working electrical outlet.
- The projector's buttons may be locked for security. Unlock the buttons or use the remote control to turn on the projector.
- If the projector's light source shuts off unexpectedly, it may have entered standby mode after a period of inactivity. Press the power button to wake the projector and adjust the **Sleep Mode Timer** setting (**Menu > Operation > Sleep Mode Timer**) to change the sleep interval.
- Turn off the **HDMI Link** setting (**Menu > Signal I/O > HDMI Link**). If this resolves the issue, check the settings on connected devices and make sure the projector is not receiving shut down requests over CEC.
- If the power button on the remote control does not turn on the projector, check its batteries.
- The power cord may be defective. Try another power cord. If that doesn't work, disconnect the cord and contact Epson.

[Replacing the Remote Control Batteries](#)

Solutions to Remote Control Problems

If the projector does not respond to remote control commands, try the following solutions:

- Check that the remote control batteries are installed correctly and have power. If necessary, replace the batteries.
- Make sure you are operating the remote control within the reception angle and range of the projector.
- Make sure the projector is not warming up or shutting down.
- Check to see if a button on the remote control is stuck down, causing it to enter sleep mode. Release the button to wake the remote control up.
- Check the status indicator to confirm that the projector is in normal operating status.
- Strong fluorescent lighting, direct sunlight, or infrared device signals may be interfering with the projector's remote receivers. Dim the lights or move the projector away from the sun or interfering equipment.
- If you lose the remote control, you can purchase another from an Epson parts distributor.

Solutions to HDMI Link Problems

If you cannot control an HDMI device using the HDMI Link feature, try the following solutions:

- Make sure all necessary cables are securely connected and the power is on for the projector and connected video sources.
- Make sure the cables meet the HDMI CEC standard.
- Make sure the connected device meets the HDMI CEC standard. See the documentation supplied with the device for more information.
- Make sure the **HDMI Link** setting is set to **On**.
- Check if the device is available in the **Device Connections** list in the Signal I/O menu. If the device does not appear, it does not meet the HDMI CEC standards. Connect a different device.

- Make sure the connected devices are turned on and in standby status. See the documentation supplied with the device for more information.
- If you connected a new device or changed any connections, make sure the CEC function is set for the connected device. You may need to restart the device.
- Connect no more than three devices that support HDMI CEC at the same time.

Where to Get Help (U.S. and Canada)

If you need to contact Epson for technical support services, use the following support options.

Internet Support

Visit Epson's support website at epson.com/support (U.S.) or epson.ca/support (Canada) and select your product for solutions to common problems with your projector. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative

To use the Epson PrivateLine Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a projector support specialist by dialing (562) 276-4394 (U.S.) or (905) 709-3839 (Canada).

Support hours are Monday through Friday, 7 a.m. to 4 p.m., Pacific Time.

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Before you call, have the following information ready:

- Product name
- Product serial number (located on the bottom or rear of the projector, or in the menu system)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer or video configuration
- Description of the problem

Purchase Supplies and Accessories

You can purchase screens, other optional accessories, and replacement parts from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada. Or you can purchase online at epsonstore.com (U.S. sales) or epsonstore.ca (Canadian sales).

You can purchase a replacement remote control from an Epson parts distributor [here](#) (U.S. sales) or [here](#) (Canadian sales).

Supported Video Display Formats

For best results, your computer's monitor port or video card resolution should be set to display in the projector's native resolution. However, your projector includes Epson's SizeWise chip that supports other computer display resolutions, so your image will be resized to fit automatically.

Your computer's monitor port or video card refresh rate (vertical frequency) must be compatible with the projector. (See your computer or video card manual for details.)

The table here lists the compatible refresh rate and resolution for each compatible video display format.

HDMI input signals

| Display format | Refresh rate (in Hz) | Resolution (in pixels) |
|----------------|----------------------|------------------------|
| VGA | 59.94 | 640 × 480 |
| SDTV (480p) | 60 | 720 × 480 |
| SDTV (576p) | 50 | 720 × 576 |
| HDTV (720p) | 50/59.94/60 | 1280 × 720 |
| HDTV (1080i) | 50/59.94/60 | 1920 × 1080 |

| Display format | Refresh rate (in Hz) | Resolution (in pixels) |
|----------------|---|------------------------|
| HDTV (1080p) | 23.98/24/29.97/30/50/59.94/60/100/119.88/120 | 1920 × 1080 |
| | 59.94/60 | 2560 × 1080 |
| 4K × 2K | 23.98/24/25/29.97/30/50/59.94/60/100/119.88/120 | 3840 × 2160 |
| | 23.98/24/50/59.94/60/100/119.88/120 | 4096 × 2160 |

Epson offers a recycling program for end of life products. Please go to [this site](#) for information on how to return your products for proper disposal.

Parent topic: [Notices](#)

Important Safety Information

Caution: Never look into the projector lens when the laser is turned on; the bright light can damage your eyes. Never let children look into the lens when it is on. Never open any cover on the projector, except the filter covers. Dangerous electrical voltages inside the projector can severely injure you. Except as specifically explained in this *User's Guide*, do not attempt to service this product yourself. Refer all servicing to qualified service personnel.

Warning: The projector and its accessories come packaged in plastic bags. Keep plastic bags away from small children to avoid any risk of suffocation.

Parent topic: [Notices](#)

Laser Safety Information

This projector is a Class 1 laser product that complies with the IEC60825-1:2014 and EN60825-1:2014 + A11:2021 international standard for lasers. Follow these safety instructions when using the projector.

Warning: Possibly hazardous optical radiation emitted from this product. Do not look at operating light source. Eye injury may result.

Warning: MOUNT ABOVE THE HEADS OF CHILDREN. The use of a ceiling mount is recommended with this product to place it above the eyes of children.

- If an error occurs in the projector, turn off the power and unplug the projector immediately. Continuing to use the projector could result in an electric shock, fire, or visual impairment. Contact Epson support.
- Do not attempt to disassemble or modify the projector. The projector contains a high-power laser component. Serious injury could result.
- Do not look into the lens during projection. Also, do not look into the lens using optical devices, such as a magnifying glass or telescope. This could cause visual impairment.
- Do not place flammable objects in front of the lens. Objects could catch fire.
- When turning on the projector at a distance using the remote control, make sure no one is looking into the lens.
- Do not allow small children to operate the projector. Children must be accompanied by an adult.
- Do not apply optical devices, such as a magnifying glass or reflector, to the projected image. Using the projector may result in physical harm, fire, or an accident.
- Do not block the light from the lens during projection. The high temperature in this area could cause burns, fire, or other damage. The lens may overheat due to the reflected light and could cause the projector to malfunction.
- Before using the projector, make sure there is nothing in the area that could reflect the projected image.
- When disposing of the projector, do not disassemble it. Dispose of the projector in accordance with your local or national laws and regulations.

Labels are attached to the projector to indicate it is a Class 1 laser product and complies with FDA performance standards for laser products except for conformance as a Risk Group 2 LIP as defined in IEC 62471-5: Ed. 1.0 (for more information see Laser Notice No. 57, dated May 8, 2019):

- **Top**

As with any bright source, do not stare into the beam (RG2 IEC/EN 62471-5:2015).

| 危险: ここを開くとクラス4のレーザー放射が出る。ビームや散乱光の目又は皮膚への被ばくを避けること。 | |

Important Safety Instructions

Follow these safety instructions when setting up and using the projector:

- Do not look into the lens when the projector is on. The bright light can damage your eyes. Avoid standing in front of the projector so the bright light does not shine into your eyes.
- Do not place any flammable objects in front of the projector lens, otherwise, a fire may occur.
- Do not touch the lens with bare hands.
- Do not place the projector on an unstable cart, stand, or table or on a surface that is unable to support its weight. Otherwise, it could fall or topple causing an accident and injury.
- If the projector is mounted on a ceiling or wall, it should be installed by qualified technicians using mounting hardware designed for use with this projector. When installing the projector in a high position, take measures to prevent it from falling by using wires to ensure safety in an emergency, such as an earthquake, and to prevent accidents. If the projector is not installed correctly, the projector could fall. This may result in injury or accidents. Contact your dealer to carry out the installation work.
- Failure to install the ceiling mount and projector correctly may cause the projector to fall. After installing the specific Epson mount that supports your projector, make sure you secure the mount to all of the projector's ceiling mount fixing points. Also, secure the projector and the mounts using wire that is strong enough to hold their weight.
- Do not install in locations where salt damage could occur, or in locations subject to corrosive gas such as sulphuric gas from hot springs. Otherwise, corrosion could cause the projector to fall. It could also cause the projector to malfunction.
- When installing or adjusting a ceiling or wall mount, do not use adhesives to prevent the screws from loosening and do not use oils or lubricants. This may cause the projector case to crack and the projector to fall from its ceiling mount. This could cause serious injury to anyone under the mount and could damage the projector.
- Do not install the projector in locations exposed to high humidity and dust, such as on a kitchen counter, in the kitchen, or near a humidifier, or in locations exposed to oil smoke or steam. Doing so could cause fire or electric shock. The projector's case could also deteriorate and be damaged causing the projector to fall from the mount.

Examples of environments that could cause the projector to fall due to case deterioration:

- Locations subject to excessive smoke or airborne oil particles, such as factories or kitchens
- Locations containing volatile solvents or chemicals, such as factories or laboratories

- Locations where the projector could be subjected to detergents or chemicals, such as factories or kitchens
- Locations in which aroma oils are often used, such as relaxation rooms
- Near devices that produce excessive smoke, airborne oil particles, or foam at events
- Locations near humidifiers
- Do not use the projector near water, sources of heat, high-voltage electrical wires, or sources of magnetic fields.
- Use the type of power source indicated on the projector. Use of a different power source may result in fire or electric shock. If you are not sure of the power available, consult your dealer or power company.
- Place the projector near a wall outlet where the plug can be easily unplugged.
- Take the following precautions when handling the plug: Do not hold the plug with wet hands. Do not insert the plug into a dusty outlet. Insert the plug firmly into the outlet. Do not pull the power cord when disconnecting the plug; always be sure to hold the plug when disconnecting it. Do not overload wall outlets, extension cords, or power strips. Failure to comply with these precautions could result in fire or electric shock.
- Do not place the projector where the cord can be walked on. This may result in fraying or damage to the plug.
- Unplug the projector from the wall outlet and allow to cool before cleaning. Use a dry cloth (or, for stubborn dirt or stains, a moist cloth that has been wrung dry) for cleaning. Do not use liquid or aerosol cleaners, any sprays containing flammable gas, or solvents such as alcohol, paint thinner, or benzene.
- Do not block the slots and openings in the projector case. They provide ventilation and prevent the projector from overheating. If the vents are covered, the internal temperature could rise and cause a fire. Do not place the projector in locations subject to high temperatures, such as near heating equipment. Do not operate the projector on a sofa, rug, or other soft surface, or set it on top of loose papers. Do not cover the projector with a blanket, curtain, or tablecloth. If you are setting up the projector near a wall, leave at least 7.9 inches (20 cm) of space between the wall and the projector.
- Do not operate the projector in a closed-in cabinet unless proper ventilation is provided.
- Never allow objects of any kind to enter any openings in the projector. Do not leave objects, especially flammable objects, near the projector. Never spill liquid of any kind into the projector.
- You may need to clean the air filter and vent. A clogged air filter or vent can block ventilation needed to cool the projector. Do not use canned air, or the gases may leave a residue.
- Do not use or store the projector in locations where it will be subject to dust or dirt. Otherwise, the quality of the projected image may decline, or the air filter may become clogged, resulting in a malfunction or fire.

- Do not store the projector outdoors for an extended length of time.
- Except as specifically explained in this manual, do not attempt to service this product yourself. Refer all servicing to qualified personnel. Opening or removing covers may expose you to dangerous voltages and other hazards.
- Never open any covers on the projector except as specifically explained in this manual. Never attempt to disassemble or modify the projector. Refer all repairs to qualified service personnel. Electrical voltages inside the projector can cause serious injury.
- Unplug the projector from the wall outlet and refer servicing to qualified service personnel under the following conditions: if it does not operate normally when you follow the operating instructions, or exhibits a distinct change in performance; if smoke, strange odors, or strange noises come from the projector; if the power cord or plug is damaged or frayed; if liquid or foreign objects get inside the projector, or if it has been exposed to rain or water; if it has been dropped or the housing has been damaged. Continuing to use the projector under these conditions may result in fire or electric shock.
- Do not touch the plug during an electrical storm. Otherwise, you may receive an electric shock.
- Unplug the projector when it will not be used for extended periods.
- Do not use the projector where it may be exposed to rain, water, or excessive humidity.
- Do not use or store the projector where it may be exposed to smoke, steam, corrosive gases, excessive dust, vibration, or shock. Doing so may result in malfunction, electric shock, and fire.
- Do not use or store the projector in places where smoke from oil or cigarettes may be present, as it can adversely affect the quality of the projected images.
- Do not use the projector where flammable or explosive gases may be present.
- Do not use or store the projector or remote control in a hot location, such as near a heater, in direct sunlight, or in a closed vehicle.
- Check the specifications for the power cable. Using an inappropriate power cable could result in fire or electric shock. The power cable supplied with the projector is intended to comply with power supply requirements for the country of purchase. If you use the projector in the country where it was purchased, only use the power cable that came with the projector.
- If you use the projector in a country other than where you purchased it, use the correct power cord for that country.
- Do not stand on the projector or place heavy objects on it.
- Do not use the projector outside of the required temperature range below:
41 to 95 °F (5 to 35 °C) at an altitude of 7500 feet (2286 m) or less, or 41 to 86 °F (5 to 30 °C) at an altitude of 7500 to 10000 feet (2286 m to 3048 m)

Doing so may cause an unstable display and could lead to projector damage. Do not use or store the projector where it may be exposed to sudden changes in temperature.

- Do not store the projector outside of the required temperature range of 14 to 140 °F (–10 to 60 °C) or in direct sunlight for long periods of time. Doing so may cause damage to the case.
- Do not place anything that can become warped or damaged by heat near the exhaust vents. Do not bring your hands or face close to the vents while projection is in progress. Do not bring your face close to the projector while it is in use.
- Before you move the projector, make sure its power is turned off, the plug is disconnected from the outlet, and all cables are disconnected.
- Do not place the source of an open flame, such as a lit candle, on or near the projector.
- During projection, do not block the light from the projector with a book or other objects. If the light from the projector is blocked, the area on which the light shines becomes hot which could cause it to melt, burn, or start a fire. Also, the lens may get hot due to the reflected light which could cause the projector to malfunction. To stop projection, use the A/V Mute function, or turn off the projector.
- Do not modify the power cord. Do not place heavy objects on top of the power cord or bend, twist, or pull it excessively. Keep the power cord away from hot electrical appliances. Do not tie the power cord to other cables.
- When a still image is displayed for a long time, image retention may occur on the screen. Do not display images in the exact same position for long periods.

[Restriction of Use](#)

Parent topic: [Notices](#)

Restriction of Use

When this product is used for applications requiring high reliability/safety such as transportation devices related to aviation, rail, marine, automotive; disaster prevention devices; various safety devices; or functional/precision devices, you should use this product only after giving consideration to including fail-safes and redundancies into your design to maintain safety and total system reliability.

Because this product was not intended for use in applications requiring extremely high reliability/safety such as aerospace equipment, main communication equipment, nuclear power control equipment, or medical equipment related to direct medical care, please make your own judgment on this product's suitability after a full evaluation.

List of Safety Symbols (corresponding to IEC60950-1 A2)

The following table lists the meaning of the safety symbols labeled on the equipment.

| No. | Symbol | Approved Standards | Description |
|-----|---|---------------------------------------|--|
| 1 |  | IEC60417 No. 5007 | "ON" (power) To indicate connection to the mains. |
| 2 |  | IEC60417 No. 5008 | "OFF" (power) To indicate disconnection from the mains. |
| 3 |  | IEC60417 No. 5009 | Stand-by To identify the switch or switch position by means of which part of the equipment is switched on in order to bring it into the stand-by condition. |
| 4 |  | ISO7000 No. 0434B, IEC3864-B3.1 | Caution To identify general caution when using the product. |
| 5 |  | IEC60417 No. 5041 | Caution, hot surface To indicate that the marked item can be hot and should not be touched without taking care. |
| 6 |  | IEC60417 No. 6042 ISO3864-B3.6 | Caution, risk of electric shock To identify equipment that has risk of electric shock. |
| 7 |  | IEC60417 No. 5957 | For indoor use only To identify electrical equipment designed primarily for indoor use. |

| No. | Symbol | Approved Standards | Description |
|-----|---|-----------------------|---|
| 8 |  | IEC60417 No. 5926 | Polarity of DC power connector To identify the positive and negative connections (the polarity) on a piece of equipment to which a DC power supply may be connected. |
| 9 |  | — | Polarity of DC power connector To identify the positive and negative connections (the polarity) on a piece of equipment to which a DC. power supply may be connected. |
| 10 |  | IEC60417 No. 5001B | Battery, general On battery powered equipment. To identify a device for instance a cover for the battery compartment, or the connector terminals. |
| 11 |  | IEC60417 No. 5002 | Positioning of cell To identify the battery holder itself and to identify the positioning of the cell(s) inside the battery holder. |
| 12 |  | — | Positioning of cell To identify the battery holder itself and to identify the positioning of the cell(s) inside the battery holder. |
| 13 |  | IEC60417 No. 5019 | Protective earth To identify any terminal which is intended for connection to an external conductor for protection against electric shock in case of a fault, or the terminal of a protective earth electrode. |
| 14 |  | IEC60417 No. 5017 | Earth To identify an earth (ground) terminal in cases where neither the symbol No.13 is explicitly required. |

| No. | Symbol | Approved Standards | Description |
|-----|---|-----------------------|---|
| 15 |  | IEC60417 No. 5032 | Alternating current To indicate on the rating plate that the equipment is suitable for alternating current only; to identify relevant terminals. |
| 16 |  | IEC60417 No. 5031 | Direct current To indicate on the rating plate that the equipment is suitable for direct current only; to identify relevant terminals. |
| 17 |  | IEC60417 No. 5172 | Class II equipment To identify equipment meeting the safety requirements specified for Class II equipment according to IEC 61140. |
| 18 |  | ISO 3864 | General prohibition To identify actions or operations that are prohibited. |
| 19 |  | ISO 3864 | Contact prohibition To indicate injury that could occur due to touching a specific part of the equipment. |
| 20 |  | — | Never look into the optical lens while the projector is on. |
| 21 |  | — | To indicate don't place anything on projector. |
| 22 |  | ISO3864 IEC60825-1 | Caution, laser radiation To indicate the equipment has a laser radiation part. |

| No. | Symbol | Approved Standards | Description |
|-----|---|---------------------------------|---|
| 23 |  | ISO 3864 | Disassembly prohibition To indicate a risk of injury, such as electric shock, if the equipment is disassembled. |
| 24 |  | IEC60417 No. 5266 | Standby, partial standby To indicate that part of the equipment is in the ready status. |
| 25 |  | ISO3864 IEC60417 No. 5057 | Caution, movable parts To indicate that you must keep away from movable parts according to protection standards. |
| 26 |  | IEC 60417 No. 6056 | Caution (moving fan blades) To indicate that you must keep away from the moving fan blades. |
| 27 |  | IEC 60417 No. 6043 | Caution (sharp corners) To indicate sharp corners that should not be touched. |
| 28 |  | — | To indicate that looking into the lens while projecting is prohibited. |
| 29 |  | ISO7010 No. W027 ISO 3864 | Warning, optical radiation (such as UV, visible radiation, IR) Take care to avoid injury to eyes and skin when in the vicinity of optical radiation. |
| 30 |  | IEC60417 No. 5109 | Not to be used in residential areas To identify electrical equipment which is not suitable for a residential area. |

FCC Compliance Statement

For United States Users

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

For Canadian Users

Binding Arbitration and Class Waiver

1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS

1.1 **Disputes.** The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.

1.2 **Binding Arbitration.** You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. **ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED.** Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.

1.3 **Pre-Arbitration Steps and Notice.** Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days, you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3131 Katella Ave., Los Alamitos, CA 90720 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILEgal@ea.epson.com or writing us at the Epson Address above. Notice of the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 **Small Claims Court.** Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

1.5 WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.

1.6 Arbitration Procedure. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at <http://www.jamsadr.com> or by calling 1-800-352-5267 (U.S. or Canada), or <https://www.jamsadr.com/about/> or by calling +1-949-224-1810 (Latin America), and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:

(i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at <http://www.jamsadr.com> ("Demand for Arbitration").

(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.

d) Award in Your Favor. For Disputes in which you or Epson seeks \$75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you \$1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).

e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.

1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.

1.8 Amendments to Section 1. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson's address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in

accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. **The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.**
